Convenience Translation of the Auditor’s Audit Report Originally Issued in Turkish

Independent Auditors’ Report on Audit of Consolidated Financial Statements

To the General Assembly of Türkiye Kalkınma ve Yatırım Bankası A.Ş.

Opinion

We have audited the consolidated statement of financial position of Türkiye Kalkınma ve Yatırım Bankası A.Ş. (“the Bank”) and its subsidiaries (collectively referred as “Group”) as of December 31, 2025 and the related consolidated statement of profit or loss, consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in shareholders’ equity, consolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the consolidated financial statements.

In our opinion the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2025 and consolidated financial performance and consolidated cash flows for the year then ended in accordance with the Banking Regulation and Supervision Agency (“BRSA”) Accounting and Financial Reporting Legislation which includes “Regulation on Accounting Applications for Banks and Safeguarding of Documents” published in the Official Gazette no.26333 dated November 1, 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by BRSA and Turkish Financial Reporting Standards (“TFRS”) for those matters not regulated by the aforementioned regulations.

Basis for Opinion

Our audit was conducted in accordance with “Regulation on independent audit of the Banks” published in the Official Gazette no.29314 dated April 2, 2015, by BRSA (BRSA Independent Audit Regulation) and Independent Auditing Standards (“ISA”) which are the part of Turkish Auditing Standards issued by the Public Oversight Accounting and Auditing Standards Authority (“POA”). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group in accordance with of Code of Ethics for Independent Auditors (Code of Ethics) published by POA and have fulfilled our other responsibilities in accordance with the code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. Key audit matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Shape the future
with confidence

Key Audit Matter	How the Key Audit Matter is addressed in our audit
<p>Financial impact of TFRS 9 “Financial Instruments” standard and recognition of impairment on financial assets and related important disclosures</p>	
<p>As presented in Section 3, disclosure numbered IX, the Group recognizes expected credit losses of financial assets in accordance with TFRS 9 Financial Instruments standard. We considered impairment of financial assets as a key audit matter since:</p> <ul style="list-style-type: none"> - Amount of on and off-balance sheet items that are subject to expected credit loss calculation is material to the financial statements - There are complex and comprehensive requirements of TFRS 9 - The classification of the financial assets is based on the Group’s business model and characteristics of the contractual cash flows in accordance with TFRS 9 and significant judgment is used on the assessment of the business model and identification of the complex contractual cash flow characteristics of financial instruments - Policies implemented by the management include compliance risk to the regulations and other practices - Processes of TFRS 9 are advanced and complex - Judgements and estimates used in expected credit loss, complex and comprehensive - Disclosure requirements of TFRS 9 are comprehensive and complex. 	<p>Our audit procedures included among others include:</p> <ul style="list-style-type: none"> - Evaluating the appropriateness of accounting policies as to the requirements of TFRS 9, Group’s past experience, local and global practices - Reviewing and testing of processes which are used to calculate expected credit losses by involving our Information technology and process audit specialists - Evaluation of the reasonableness and appropriateness of key judgments and estimates determined by management and the methods, judgments and data sources used in calculating expected loss, taking into account standard requirements, industry and global practices - Reviewing the appropriateness of criteria in order to identify the financial assets having solely payments of principal and interest and checking the compliance to the Group’s Business model - Reviewing the Group’s classification and measurement models of the financial instruments and comparing with TFRS 9 requirements - Evaluating the alignment of the significant increase in credit risk determined during the calculation of expected credit losses, default definition, restructuring definition, probability of default, loss given default, exposure at default and macro-economic variables that are determined by the financial risk management experts with the Group’s past performance, regulations, and other processes that has forward looking estimations - Assessing the completeness and the accuracy of the data used for expected credit loss calculation. - Testing the mathematical accuracy of expected credit loss calculation on sample basis - Evaluating the necessity and accuracy of the updates made or required updates after the modeling process - Auditing of TFRS 9 disclosures.

**Shape the future
with confidence**

Responsibilities of Management and Directors for the Consolidated Financial Statements

Group management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the BRSA Accounting and Reporting Legislation and for such internal control as management determines is necessary to enable the preparation of the financial statement that is free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

In an independent audit, the responsibilities of us as independent auditors are:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with BRSA Independent Audit Regulation and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with BRSA Independent Audit Regulation and ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion (The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control).
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

**Shape the future
with confidence**

Obtain sufficient appropriate audit evidence regarding the financial information of the entities and business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with government with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

- 1) In accordance with Article 402 paragraph 4 of the Turkish Commercial Code ("TCC") no 6102; no significant matter has come to our attention that causes us to believe that the Bank's bookkeeping activities and financial statements for the period January 1 – December 31, 2025, are not in compliance with the TCC and provisions of the Bank's articles of association in relation to financial reporting.
- 2) In accordance with Article 402 paragraph 4 of the TCC; the Board of Directors submitted to us the necessary explanations and provided required documents within the context of audit.

SECTION ONE

GENERAL INFORMATION

I. Establishment Date of the Parent Bank, Initial Articles of Association, History of the Bank Including the Changes of These Articles

The Parent Bank was established on 27 November 1975 according to the Decree Based on Law numbered 13 as a related institution of the Ministry of Trade and Technology with the legal title of ‘Devlet Sanayi ve İşçi Yatırım Bankası A.Ş.’. Some adjustments were made on the status of the Bank with the Decree Based on Law numbered 165 dated 14 November 1983.

On 15 July 1988, its legal title was changed to Türkiye Kalkınma Bankası A.Ş. by being associated to the Prime Ministry in the context of the Decree Law numbered 329 and in parallel with the developments in its activities. The Bank had become a development and investment bank that provides financing support to companies in tourism sector as well as trade sector by taking over T.C. Turizm Bankası A.Ş. with all of its assets and liabilities with the decision of Supreme Planning Council dated 20 January 1989 and numbered 89/T-2. Also with the Decree Law numbered 401 dated 12 February 1990, some of the articles related to the Bank status were changed.

With the Law dated 14 October 1999 and numbered 4456, Decree Law numbered 13, 165, 329 and 401 were revoked and the establishment and operating principles of the Bank were rearranged.

Türkiye Kalkınma ve Yatırım Bankası A.Ş. Law dated 24 October 2018 and numbered 7147 was abolished and the Law dated 14 October 1999 and numbered 4456 was revoked. The Bank’s name was changed to Türkiye Kalkınma ve Yatırım Bankası A.Ş with the law numbered 7147.

II. Capital Structure of the Parent Bank, Shareholders that Retain Direct or Indirect Control and Management of the Bank Solely or Together, Changes about These Issues During the Year and Disclosures about the Group

The capital ceiling of the Parent Bank which is subject to registered capital system is TL 10.000.000. The issued capital within the registered capital is TL 10.000.000 (The Parent Bank’s capital consists of 1 trillion shares with par value of TL 0,01 each), and the shareholders and their shares in the issued capital are shown below:

Shareholders	Share Amount (Thousand TL)	Share (%)	Paid-in Capital (Thousand TL)	Unpaid Capital (Thousand TL)
Republic of Türkiye Ministry of Treasury and Finance	9.908.153	99,08	9.908.153	-
Other Shareholders ^(*)	91.847	0,92	91.847	-
Total	10.000.000	100,00	10.000.000	-

^(*) Includes all institutions and individuals and shares of these shareholders are traded in Borsa İstanbul. Therefore, number of shareholders can’t be known.

(**) Executive Vice President Yeşim ŞİMŞEK resigned from her position as of 1 July 2025. Corporate Banking and Project Finance, Corporate Banking Sales Units are now under the supervision of General Manager İbrahim H. Öztöp.

Chief Internal Inspector:

Name Surname	Duty	Assignment Date	Education Level	Experience in Banking Sector (Years)
Dr. Kaan Ramazan ÇAKALI	Chief Internal Inspector	27.05.2019	Doctorate	22

Executives mentioned above do not own any shares of the Bank in the part which is not publicly traded.

SECTION ONE (Continued)

GENERAL INFORMATION (Continued)

IV. Information About Persons and Institutions that Have Qualified Shares Attributable to the Parent Bank

Republic of Türkiye Ministry of Treasury and Finance owns 99,08% of the shares of the Parent Bank.

V. Summary of Functions and Lines of Activities of the Parent Bank

As an investment and development bank of Türkiye Kalkınma ve Yatırım Bankası A.Ş.'s operating areas are supporting investments and projects for sustainable growth, ensuring the efficient use of capital and fund resources, financing domestic, international and international joint investments, and profit partnership or lease-based loan transactions by using modern development and investment banking tools in line with our country's development goals, to ensure that all development and investment banking functions can be performed in a competitive, dynamic and effective manner. As of 31 December 2025, the Bank has 1 branch operating in Ankara. (31 December 2025: 1 branch).

As of 31 December 2025, the Group has 414 employees (31 December 2024: 360 employees).

VI. Information on Application Differences Between Consolidation Practices as per the Regulation on Preparation of Consolidated Financial Statements of Banks and the Turkish Accounting Standards, and Entities Subject to Full or Proportional Consolidation or Deducted From Equity or Not Subject to Any of These Three Methods

The Bank has acquired a 100% stake in Kalkınma Yatırım Varlık Kiralama Anonim Şirketi, established on 28 May 2020 with a nominal capital of TL 50, which was subsequently increased to TL 250 on 17 June 2025, and in Kalkınma Girişim Sermayesi Portföy Yönetimi Anonim Şirketi, established on 17 November 2020 with an initial nominal capital of TL 1.800, which was subsequently increased to TL 50.000 on 19 August 2024.

In accordance with the Communiqué on the Preparation of Consolidated Financial Statements of Banks and the Turkish Accounting Standards, Kalkınma Girişim Sermayesi Portföy Yönetimi Anonim Şirketi and Kalkınma Yatırım Varlık Kiralama Anonim Şirketi are consolidated in the consolidated financial statements by full consolidation method.

According to the Paragraph 4th of Article 6th of Law dated 24 October 2018 and numbered 7147 about Türkiye Kalkınma ve Yatırım Bankası A.Ş., the Bank is not subject to the provisions of the Consolidated Audit and Consolidated Financial Reporting in Banking Law No. 5411 and in the relevant legislation due to its shares in Türkiye Development Fund of which the Bank is the founder.

Since the Parent Bank's associates are not financial institutions, they are not consolidated using the equity method in the consolidated financial statements within the scope of the Communiqué on the Preparation of Consolidated Financial Statements of Banks.

VII. Current or Likely Actual or Legal Barriers to Immediate Transfer of Equity or Repayment of Debts Between the Bank and Its Subsidiaries

None.

The accompanying explanations and notes form an integral part of these consolidated financial statements.

SECTION THREE

ACCOUNTING POLICIES

I. Explanations on Basis of Presentation

a. The preparation of financial statements and related notes according to Turkish Accounting Standards and Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks:

As prescribed in the Article 37 of the Banking Act No. 5411, the Bank prepares its financial statements and underlying documents in accordance with the “Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks” and other regulations, explanations and circulars on accounting and financial reporting principles announced by the Banking Regulation and Supervision Agency (“BRSA”) and Turkish Accounting Standards (“TAS”) and Turkish Financial Reporting Standards (“TFRS”) published by Public Oversight Accounting and Auditing Standards Authority (“POA”) except for matters regulated by BRSA legislation (together referred as “BRSA Accounting and Financial Reporting Legislation”).

The accompanying consolidated financial statements and explanations and notes to these statements as of 31 December 2025 have been prepared in accordance with the “Communiqué on Financial Statements to be Disclosed to Public by Banks and Explanations and Footnotes Thereof” published in the Official Gazette numbered 28337, dated 28 June 2012, “Communiqué on the Preparation of Consolidated Financial Statements of Banks” published in the Official Gazette numbered 26340, dated 8 November 2006 and “Communiqué on Disclosures About Risk Management to be Announced to Public by Banks” published in the Official Gazette numbered 29511, dated 23 October 2015 and amendments and changes to these communiqués.

b. Changes in accounting policies and disclosures:

In accordance with the TAS 29 "Financial Reporting in Hyperinflationary Economies", entities whose functional currency is that of a hyperinflationary economy report their financial statements based on the purchasing power of the currency at the end of the reporting period. Following the announcement made by the Public Oversight, Accounting and Auditing Standards Authority (“POA”) on 23 November 2023, entities applying TFRS are required to present their financial statements for annual reporting periods ending on or after 31 December 2023, adjusted for inflation in accordance with the accounting principles set forth in TAS 29. The same announcement stated that regulatory authorities empowered to regulate and supervise in their respective fields may determine different transition dates for the application of inflation accounting. In this context, in accordance with the BRSA's decisions dated 12 December 2023- numbered 10744, dated 5 December 2024- numbered 11021 and dated 18 December 2025- numbered 11340 respectively, it has been decided not to subject the financial statements of banks and financial leasing, factoring, financing, savings financing and asset management companies to inflation adjustment required under TAS 29 in 2024, 2025 and 2026. Accordingly, TAS 29 has not been applied in the financial statements of the Bank as of 31 December 2025.

While preparing the consolidated financial statements, the Group used the financial statements of its subsidiaries Kalkınma Yatırım Varlık Kiralama A.Ş. and Kalkınma Girişim Sermayesi Portföy Yönetimi A.Ş., which are not subject to inflation accounting in accordance with TAS 29.

c. Other issues:

None.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

II. Basis of Valuation Used in the Preparation of Financial Statements

Accounting policies for the preparation of consolidated financial statements and valuation principles used are applied in accordance with BRSA Accounting and Financial Reporting Legislation. Those accounting policies and valuation principles are explained below notes through II - XXVI.

Except for the consolidated financial assets and liabilities carried at fair value, the consolidated financial statements have been prepared in thousand of Turkish Lira (“TL”) under the historical cost.

III. Explanations on Utilization Strategy of Financial Instruments and Foreign Currency Transactions

Most of the liabilities of the balance sheet of the Parent Bank consists of funds obtained from domestic and international markets. The majority of funds obtained domestically consists of funds provided by Central Bank of the Republic of Türkiye, international institutions such as Islamic Development Bank, KfW Development Bank and the OPEC International Development Fund, via Republic of Türkiye Ministry of Treasury and Finance and the rest consists of funds provided through short-term money market transactions within the framework of balance sheet management. The Bank acts as an intermediary for those funds provided by the Republic of Türkiye Ministry of Treasury and Finance to be utilized in various sectors. The funds obtained internationally consist of medium and long term loans borrowed from World Bank, European Investment Bank, Council of Europe Development Bank, Islamic Development Bank, International Islamic Trade Finance Corporation, Japan Bank for International Cooperation, Black Sea Trade and Development Bank, Asian Infrastructure Investment Bank, KfW Development Bank, China Development Bank and the securities issued as allocated to French Development Agency.

During the utilization of the funds obtained, the Parent Bank pays attention for utilization of loans in line with borrowing conditions while taking assets-liability mismatch into account, and tries to avoid maturity, exchange rate and liquidity risks. Exchange rate risk, interest rate risk and liquidity risk are measured and monitored on a regular basis, necessary measures are taken as a result of changes in the market data and balance sheet management is performed within the predetermined risk limits and legal limits.

A non-speculative exchange rate position risk management is applied to limit the Parent Bank’s exchange rate risk. For that reason, during the determination of the allocation of balance sheet and off-balance sheet assets according to currencies, foreign currency management policy is applied in the most effective way.

Commercial placements are directed to high-profit and low-risk assets by taking Parent Bank-specific and domestic economic expectations, market conditions, expectations and inclinations of loan customers, risks like interest, liquidity, exchange rate etc. into account, and safety policy is kept in the foreground for placement activities. Basic macro goals concerning balance sheet sizes are determined during budgeting and the transactions are carried out according to work programs prepared in this context.

The exchange rates, interest and price movements are closely monitored; transaction and control limits that are developed from the Parent Bank’s previous experiences are based on when taking positions as well as legal limits. In this way, limit excesses are prevented.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

III. Explanations on Utilization Strategy of Financial Instruments and Foreign Currency Transactions (Continued)

During foreign currency transactions, procedures detailed below are applied.

- a. Foreign currency monetary assets and liabilities are translated to Turkish Lira (TL) with the buying exchange rates announced by the Parent Bank at the end of period and foreign exchange differences are accounted as foreign exchange gain or loss.
- b. There are no exchange rate differences capitalized as of the balance sheet date.
- c. Basic principles of exchange rate risk management policy: Decisions to avoid exchange rate and parity risks are taken by the Asset- Liability Committee that meets regularly. The decisions are in line with the models prepared in the context of the basic boundaries of Foreign Currency Net General Position/Shareholders' Equity Ratio which is included in legal requirements, and those decisions are carried out carefully. To avoid parity risk, foreign exchange position is managed by taking singular and general positions.
- d. Foreign currency transactions are calculated using the exchange rates prevailing at the dates of transactions and the profit/losses are included in the statement of profit or loss of the related period

IV. Explanations on Consolidated Partnerships

a. Consolidation principles applied:

Consolidated financial statements are prepared in accordance with the “Communiqué on the Preparation of Consolidated Financial Statements of Banks” and “TFRS - 10 Consolidated Financial Statements” published in the Official Gazette dated 8 November 2006 and numbered 26340.

b. Consolidation principles of subsidiaries:

Subsidiaries, whose capital or management is directly or indirectly controlled by the Parent Bank, have the power over the investment made by the Parent Bank and the ability to use its power over the investee in order to affect the amount of returns it has and the amount of returns it will gain due to its relationship with the invested legal entity. partnerships it has.

Subsidiaries are consolidated using the full consolidation method on the basis of operating results, asset and equity sizes. According to the full consolidation method, one hundred percent of the subsidiaries' assets, liabilities, income, expenses and off-balance sheet items are consolidated with the Parent Bank's assets, liabilities, income, expense and off-balance sheet items. The book value of the investments of the Bank in its subsidiaries and the capital of its subsidiaries have been clarified. Balances arising from the transactions between the partnerships within the scope of consolidation have been mutually offset.

The Parent Bank and its consolidated subsidiaries will be referred to as the “Group” in the remainder of the report.

The title of the partnerships within the scope of consolidation, the location of the headquarters, the activity subject, the effective and direct shareholding ratio are as follows:

Title	Center of Activities (City/Country)	Main Area of Activity	Effective Partnership Ratios (%)	Direct and indirect partnership rates (%)
Kalkınma Girişim Sermayesi Portföy Yönetimi A.Ş.	İstanbul/Türkiye	Portfolio Management	100	100
Kalkınma Yatırım Varlık Kiralama A.Ş.	İstanbul/Türkiye	Asset Lease	100	100

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

V. Representation of Affiliates, Subsidiaries and Jointly Controlled Partners Not Included in Consolidation in the Consolidated Financial Statements

Affiliates, subsidiaries and jointly controlled partners that are not included in the scope of consolidation are recognized at cost in accordance with “TAS - 27 Separate Financial Statements” and reflected in the consolidated financial statements after deducting if it has any provision for loss in value.

VI. Explanations on Futures, Option Contracts and Derivative Instruments

Derivative transactions of the Bank mainly consist of forward foreign currency purchase and sale and currency swap transactions. The Bank has no derivative instruments that can be separated from the host contract.

Derivative instruments are classified as “Derivative Financial Assets at Fair Value Through Profit or Loss” or “Derivative Financial Assets at Fair Value Through Other Comprehensive Income” within the scope of TFRS 9 Financial Instruments. Derivative financial instruments are recorded with the fair value at the date of agreement and revalued at fair value in the following reporting periods. Depending on whether the valuation difference is negative or positive, these differences are shown in the relevant accounts in the balance sheet. Receivables and liabilities arising from derivative transactions are recorded in off-balance sheet accounts over their contract amounts. Differences in the fair value of derivative transactions at fair value through profit or loss are accounted for under profit/loss from derivative financial transactions in the trading profit/loss item in statement of profit or loss.

VII. Explanations on Interest Income and Expenses

Interests are recorded according to the effective interest rate method (rate equal to the rate in calculation of present value of future cash flows of financial assets or liabilities).

If a financial asset possesses on uncollected interest accrual before its acquisition by the Parent Bank, interest collected afterwards is separated into periods such as before its acquisition and after acquisition, and only the part of after acquisition is recognized as interest income on the statement of profit or loss.

The Parent Bank does not cancel the interest accruals and discounts of loans and other receivables that have become non-performing loans within the framework of the effectuated in 1 January 2018 “Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves” published in the Official Gazette dated 22 June 2016 and numbered 29750 and monitors said amounts in interest income. Within the scope of TFRS 9 methodology, the expected credit loss provision is calculated based on the interest accruals and discounts added amounts.

VIII. Explanations on Fees and Commission Income and Expenses

Fees and commissions received from cash loans, that are not attributable to interest rates applied, and fees for banking services are recorded as income in accordance with TFRS 15 ‘Revenue from Contracts with Customers’ on the date of collection. Fees and commissions paid for the funds borrowed, which are not attributable to interest rates of the funds borrowed, are recorded as expense on the date of the payment. All other commission and fee income and expenses are recorded on an accrual basis. Earnings in return of agreements or as a result of services provided for real or legal third parties for purchase or sale of assets are recorded as income when collected.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on Financial Assets

Financial assets mainly constitute the Group's commercial activities and operations. These instruments have the ability to expose, affect and diminish the liquidity, credit and interest rate risks in the financial statements. The Group adds its financial assets to the financial statements in accordance with the provisions of the "Importing and Excluding the Financial Statements" section of the TFRS 9 Standard and subtracts them from the financial statements.

Financial assets are included in the statement of financial status when they become a party to the terms of the contract related to the financial asset and measured at fair value for the first time (excluding trade receivables under TFRS 15 Revenue from Contracts with Customers).

In accordance with the classification provisions of the TFRS 9 Financial Instruments Standard, on the basis of the following matters financial assets are measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss by:

- The business model used by the entity for the management of financial assets,
- Properties of contractual cash flows of a financial asset.

Business Model Test and Cash Flow Characteristics Test are performed to determine the classification of financial assets. Purchase and sale transactions of these financial assets are accounted according to their "delivery date". The classification of financial assets is decided on the date of their acquisition, taking into account "Testing of Contractual Cash Flows Only Interest and Principal and Evaluation of Business Model". When the business model used for the management of financial assets is changed, all financial assets affected by this change are reclassified.

Financial Assets Measured at Fair Value through Profit and Loss:

Financial assets whose fair value differences are reflected in profit/loss are mainly for a short-term securities acquired for the purpose of being sold or bought back in the near future.

Financial assets whose fair value difference is reflected in profit/loss are reflected to the balance sheet at their cost values and are subject to valuation at fair value following their recording. Fair values are determined by using the weighted average clearing prices on BIST as of the balance sheet date for securities traded on Borsa Istanbul (BIST) and investor valuation and price reports for non-traded securities.

Gains or losses resulting from the valuation of financial assets whose fair value difference is reflected in profit/loss are reflected in profit/loss accounts. The positive difference between the acquisition cost and discounted value during the holding of financial assets for trading purposes is recorded in "Interest Income", if the fair value of the asset is above its discounted value, the positive difference is recorded in the "Capital Market Transactions Profits" account and if it is below, the negative difference is recorded in the "Capital Market Transactions Losses" account.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on Financial Assets (Continued)

Financial Assets Measured at Fair Value Through Other Comprehensive Income:

Financial assets are classified as financial assets at fair value through other comprehensive income where the business models aim to hold financial assets in order to collect the contractual cash flows and selling assets and the terms of financial asset give rise to cash flows that are solely payments of principal of interest at certain dates.

Financial assets measured at fair value through other comprehensive income are initially recognized at cost including the transaction costs. After initial recognition, valuation of the financial assets at fair value through other comprehensive income is based on fair value. For securities traded on Borsa Istanbul (BIST), fair values are found by using the weighted average settlement prices in BIST at the balance sheet date.

In the case a price does not occur in an active market, it is accepted that fair value cannot be reliably determined and amortised cost which is calculated by using the effective interest rate method is accepted as the fair value. The difference between the cost and fair value is accounted as interest income accrual or impairment loss. Interest income for financial assets measured at fair value through other comprehensive income with fixed or floating interest rate shows the difference between cost and amortised cost calculated by using the effective interest rate method and accounted for as interest income from marketable securities. Unrealized gains and losses arising from changes in fair value of the financial assets measured at fair value through other comprehensive income and which are denoting the difference between fair value and amortised cost of financial assets, are recognized in the “Accumulated Other Comprehensive Income or Loss that will be Reclassified to Profit or Loss” and amounts accounted for under equity are reflected to statement of profit or loss when financial assets are sold.

In the event that the financial assets reflected to other comprehensive income are disposed of in the case of the real value difference, the value increases/decreases pursued in the equity values value increase fund account are reflected in the statement of profit or loss.

Equity Instruments Measured at Fair Value Through Other Comprehensive Income:

During initial recognition an irreversible preference can be made about reflecting the changes in the fair value of the investment in an equity instrument within the scope of TFRS 9, which are not held for trading purposes or that are not contingent on the financial statements of the acquirer in a business combination where the TFRS 3 Business Combinations standard is applied in the other comprehensive income. The choice in question is made separately for each financial instrument.

The relevant fair value differences recognized in the statement of other comprehensive income are not transferred to profit or loss in the following periods but are transferred to previous periods' profit/loss. Dividends from such investments are included in the financial statements as profit or loss unless they are explicitly a part of the investment cost recovery. TFRS 9 impairment provisions are not valid for equity investments.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on Financial Assets (Continued)

Equity Instruments Measured at Fair Value Through Other Comprehensive Income (Continued):

Equity securities representing a share in the capital, which are classified as financial assets at fair value through other comprehensive income, are accounted with their fair values if they are traded in organized markets, and/or their fair value can be determined reliably. However, the cost may be an appropriate estimation method for determining fair value in some exceptional circumstances. This may be the case if there is not enough recent information on fair value measurement or if fair value can be measured by more than one method and the cost best reflects the fair value estimation among these methods.

Financial Investments Measured at Amortised Cost and Loans:

Financial Investments Measured at Amortised Cost

If the financial asset is held within a business model whose objective is to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, the financial asset is classified as a financial asset measured at amortised cost.

Financial assets measured at amortised cost are initially recognised at amortised cost using the effective interest method, less provision for impairment, if any, or interest income rediscount. Interest earned on financial assets measured at amortised cost is recognised as interest income.

The Bank's securities portfolio includes consumer price (CPI) indexed bonds, which are classified as financial assets whose fair value difference is reflected in other comprehensive income and financial assets measured by their amortized cost. As stated in the CPI-Indexed Bonds Investor Guide of the Ministry of Treasury and Finance of the Republic of Türkiye, the reference indices used in the calculation of the actual coupon collection amounts of these securities are formed according to the CPI of two months ago. The valuation of these securities is carried out according to the effective interest method within the framework of the reference index formula specified in this guideline.

Loans

Loans represent unquoted financial assets in an active market that provide money, goods or services to the debtor with fixed or determinable payments.

Loans are initially recognized with cost and carried at amortised cost calculated using the effective interest rate method at the subsequent periods. Transaction fees, dues and other expenses paid for loan guarantees are considered as a part of the transaction cost and reflected to the customers.

Cash loans granted by the Bank consist of investment and working capital loans and loans given through banks and leasing companies (APEX method).

Foreign currency indexed loans are converted into Turkish Lira with the exchange rate on the opening date and followed in Turkish Currency accounts. Repayments are calculated by using the exchange rates at the repayment dates and exchange differences are recognized under the foreign currency income and expense accounts.

The Bank management monitors the loan portfolio at regular intervals and in case of doubts regarding the uncollectibility of the loans extended, the loans that are considered to have become problematic are classified in accordance with the principles set out in the 'Regulation on Procedures and Principles Regarding the Classification of Loans and Provisions to be set aside (Provisions Regulation)' published in the Official Gazette dated 22 June 2016 and numbered 29750 and last amended by the regulation published in the Official Gazette dated 18 October 2018 and numbered 30569 and within the framework of TFRS 9.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on Financial Assets (Continued)

Loans (Continued):

With the Law No. 7147 dated 24 October 2018 on Türkiye Kalkınma ve Yatırım Bankası A.Ş., it was decided that the first paragraph of Article 53 of the Banking Law No. 5411 shall not be applied to the Bank and the procedures and principles regarding the classification, monitoring, follow-up, provision ratios and collaterals of loans shall be determined by the Board of Directors of the Bank. In this context, the Bank has decided to perform the classification and provisioning of loans in accordance with TFRS 9 Standard and Provisions Regulation.

Cash and Cash Equivalents:

Cash and cash equivalents are cash on hand, demand deposits and other highly liquid short-term investments with maturity of 3 months or less following the date of purchase, which is readily convertible to a known amount of cash and does not bear the risk of significant amount of value change. The carrying amounts of these assets represent their fair values.

X. Explanations on Impairment of Financial Assets

As of 1 January 2019, the Parent Bank recognizes provisions for impairment in accordance with TFRS 9 requirements according to the “Regulation on the Procedures and Principles for Classification of Loans and Provisions to be Set Aside”. In this framework, the method of allocating credit provisions applied within the framework of the relevant legislation of BRSA has been replaced with the expected credit loss model.

Expected credit loss (ECL) model is used for instruments (such as bank deposits, loans and leasing receivables) recorded in the statement of other comprehensive income over amortized cost or fair value and in addition for financial lease receivables that cannot be measured at fair value through profit/loss, contract assets, credit commitments, and financial guarantee contracts.

The guiding principle of the ECL model is to reflect the general outlook of the increase or improvement in credit risk of financial instruments. The amount of ECLs defined as loss provision or provision depends on the degree of increase in credit risk since the loan was first issued.

Within the scope of TFRS 9 Financial Instruments, three basic factors regarding the measurement of expected credit loss are taken into consideration. These,

- (a) the amount weighted according to the neutrality and probabilities determined by evaluating the possible outcome range,
- (b) time value of money,
- (c) reasonable and supportable information on past events, current conditions and forecasts of future economic conditions that can be obtained without incurring excessive cost or effort as of the reporting date.

Taking into consideration these three factors, the Parent Bank’s historical data is modeled, and the expected loss amount is calculated for each loan. Since the expected loss represents the future value, the present value of this amount is calculated with the discounting factor.

In order to reflect the changes in credit risk since the initial recognition of credit risk, the loss provision is updated at each reporting date in which the expected loss calculations are performed.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

X. Explanations on Impairment of Financial Assets (Continued)

The Parent Bank assesses whether there has been a significant increase in credit risk in the financial instrument for the first time since it was included in the financial statements. In making this assessment, the Parent Bank uses the change in default risk during the expected life of the financial instrument. To make this assessment, the Parent Bank compares default risk related to the financial instrument as of the reporting date and the default risk related to the financial instrument for the first time in the financial statements and takes into consideration reasonable and supportable information which can be obtained without incurring excessive costs or efforts and is reasonable indication of significant increases in credit risk since its introduction for the first time.

In the rating methodologies and models used in TFRS 9 expected loss calculations, customers are segmented into Corporate-SMEs, Project Finance, and Financial Institutions (including Banks).

In the TFRS 9 impairment, a 3-step approach is used in which the credit risk level increases at each stage:

Stage 1: It refers to all accounts that have not shown any deterioration in credit quality since the loan was issued. All accounts defined as having low credit risk will be classified as Stage 1 without periodically checking whether there is a significant increase in credit risk. A 12-month provision calculation is performed for all accounts classified in Stage 1.

Stage 2: Refers to all accounts showing significant deterioration in credit quality since the loan was issued. For all accounts classified in Stage 2, lifetime provision calculations are performed.

Stage 3: Refers to all impaired assets. For all accounts classified in Stage 3, lifetime provision calculations are performed.

Financial assets in Basket 3 might be evaluated individually in the current provision calculations made by the Bank, and final evaluation is made by the Board of Directors together with their justifications. In this context, the Bank has allocated additional provisions for customers whose impacts are considered to be high, by making individual valuations in the calculation of expected credit losses.

TFRS 9 requires a 12-month compensation for all loans in Stage 1, and a lifetime provision for all remaining loans.

Significant Increase in Credit Risk:

Customers classified under the first group are classified under the second group if they meet the following criteria;

- The maximum number of delay days of the customer is over 30
- Restructuring of a debtor in financial difficulty by granting concessions
- Customer has close monitoring criteria
- Criteria for significant increase in credit risk: For customers rated with the Corporate-SME Rating Model, the criterion of significant increase in credit risk is met if the deterioration between the rating obtained on the basis of the latest financial balance sheet and the rating obtained one year ago is more than 4 degrees and the current rating is a rating equivalent to Group C ratings (9, 10, 11 ratings) or the current rating is calculated as 11, which is the worst rating class. If the customer's rating from a year ago is not available, the first rating within 1 year is taken into account instead.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

X. Explanations on Impairment of Financial Assets (Continued)

Significant Increase in Credit Risk (Continued):

For customers in the Project Finance portfolio who are rated with the Project Finance Rating Model, if the current rating is in the worst class (8 - Weak), the significant increase in credit risk criterion is met. If the customer does not have a rating score from the previous year, the first rating score within 1 year is taken into account instead.

In order to evaluate the significant increase in credit risk criterion, customers are evaluated periodically (at least annually) and their rating scores are updated. The evaluation period is shortened for borrowers who receive a significant deterioration in credit risk signals during the year.

The classification criteria under the second group work for all Bank customers, and in addition, in the event of negative market intelligence, classification under the second group can be made. The classification rules determined under TFRS 9 work for all portfolios.

Definition of Default:

“When defining the default for the purpose of determining the default risk according to TFRS 9, the entity uses a default definition consistent with the definition used for the credit risk management purposes of the related financial instrument and, if appropriate, takes into account qualitative indicators (e.g. financial commitments). However, unless the entity has reasonable and supportable information that reveals that default will occur when there is a longer delay, there is an otherwise demonstrable pre-acceptance that the default will not occur after the financial instrument expires after 90 days. The definition of default used for these purposes is applied consistently to all financial instruments unless information that proves that another definition of default is more appropriate for a particular financial instrument is available.” According to the article, the definition of default is used within the scope of modeling.

The definition of default used in the Bank is as follows:

- Customers with more than 90 days of delay (The number of customer delay days represents the highest number of delay days of the customer’s existing loans on the relevant reporting date.)
- Compensation of the letter of guarantee received by the Bank for collateral
- The Bank is of the opinion that the debtor will not be able to pay its debts to the Bank in full without recourse to collateral.

12-Month Expected Loss:

12-month loan loss corresponds to a part of the expected loan loss that may arise from the possible default status of the loan within 12 months of the reporting date.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

X. Explanations on Impairment of Financial Assets (Continued)

Lifetime Expected Loss:

Lifetime losses arise from all possible default events that may occur during the expected life span of the financial instrument after the reporting date. Life expectancy is related to the maturity of the financial instrument.

One of the risk parameters to be used in calculating the provision amounts to be set as per TFRS 9 is the Probability of Default (PD) information. Probability of Default refers to the possibility of a live loan falling into default. PD calculation is carried out by considering past data, current conditions and prospective macroeconomic expectations.

In the Bank's new models, qualitative and quantitative scores are taken into account when evaluating the Corporate-SME and Project Finance segments. After the qualitative and quantitative scores of the company are determined, the mentioned points are weighted according to the company scale and the company's rating score is calculated.

In the new methodology, the Financial Institutions (including receivables from banks) portfolio is evaluated with the ratings of internationally recognized rating agencies. If there is no rating assigned by a rating agency, then the rating of the country where the financial institution is located is taken into account.

As of 30 June 2024, in the new macro models applied, Vasicek's approach based on a single-factor explanatory model was used for both portfolios in order to calculate default probabilities including forward-looking macro impact for the Corporate-SME portfolio and the Financial Institutions portfolio. The systemic risk factor to be used for this approach is the GDP growth rate, which is considered to be one of the most comprehensive macroeconomic indicators and is widely used in the sector for the systemic risk factor. This systemic risk factor is reviewed and revised on an annual basis.

In order to obtain default probabilities for the Project Finance portfolio, it has been decided to use the Expected Loss (EL) values that will be used for specialized loans in accordance with paragraph 37 of the BRSA Communiqué on Calculation of the Amount Subject to Credit Risk with Internal Ratings Based Approaches (BRSA Communiqué on Calculation of the Amount Subject to Credit Risk with Internal Ratings Based Approaches) also within the scope of TFRS and default probabilities to be applied according to rating groups have been obtained over these values.

In addition to the baseline scenario value, positive and negative scenarios are taken into account and the future period forecasts for each rating group are realized with an approach based on the correlation of the portfolio default rate with a key macro variable.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XI. Explanations on Offsetting of Financial Assets and Liabilities

Financial assets and liabilities are offset on balance sheet when the Group has a legally enforceable right to set off, and the intention of collecting or paying the net amount of related assets and liabilities or the right to offset the assets and liabilities simultaneously.

XII. Explanations on Sales and Repurchase Agreements and Lending of Securities

Securities sold in repurchase agreements (repo) are followed in the balance sheet accounts in line with Uniform Chart of Accounts. Accordingly, the government bonds and treasury bills sold to the clients in the context of repurchase agreements are classified as “Subject to Repurchase Agreements” and are valued at fair values or at discounted values using effective interest rate method according to the holding purposes in the Bank portfolio. Funds gained by repurchase agreements are shown separately in the liability accounts and interest expense accrual is calculated for these funds.

Securities that were purchased to resell commitment (reverse repurchase agreements) are shown as a line item under “Money Market Placements” line. For the difference between the purchase of securities and resale prices of the reverse repo agreements for the period; income accrual is calculated using the effective interest rate method. There are no marketable securities lending transactions.

XIII. Explanations on Fixed Assets Held for Sale and Discontinued Operations and Related Liabilities

Non-current assets held for sale and non-current assets related to discontinued operations and related liabilities are recognized in the financial statements in accordance with the provisions of TFRS 5 "Standard for Fixed Assets Held for Sale and Discontinued Operations". Assets that are classified as held for sale (or the disposal group) are measured at the lower of its carrying amount and fair value less costs to sell. In order to classify a tangible fixed asset as held for sale, the asset (or the disposal group) should be available for an immediate sale in its present condition subject to the terms of any regular sales of such assets (or such disposal groups) and the sale should be highly probable. For a highly probable sale, the appropriate level of management must be committed to a plan to sell the asset (or the disposal group), and an active program to complete the plan should be initiated to locate a customer.

Also, the asset should have an active market sale value, which is a reasonable value in relation to its current fair value. Events or circumstances may extend the completion of the sale more than one year. Such assets (or the disposal group) are still classified as held for sale if there is sufficient evidence that the delay in the sale process is due to the events and circumstances occurred beyond the control of the entity or the entity remains committed to its plan to sell the assets. The Parent Bank has no assets classified as held for sale.

A discontinued operation is a component that either has been disposed of or is classified as held for sale. Gains or losses relating to discontinued operations are presented separately in the statement of profit or loss. The Parent Bank has no discontinued operations.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XIV. Explanations on Goodwill and Other Intangible Assets

As at the balance sheet date, there is no goodwill recorded in the balance sheet of the Bank.

Intangible fixed assets first are carried at cost which includes acquisition costs and other direct costs bearded necessary for the assets to become ready for use. Subsequent to recognition, intangible assets are presented in financial statements at cost less any accumulated amortization and accumulated impairment losses, if any.

Amortization is charged on a straight-line basis over their estimated useful lives which is 33,33% or 6,67%. Useful life of other intangible assets are determined by the consideration of items like expected usage period of the asset, technical, technological or other kind of obsolesce and maintenance costs incurred to obtain economic benefit from the assets.

Expenses related to existing computer software and computer software improvement that enhance original content and useful life, are capitalized over the software. Those capitalized expenses are amortised using the “straight line method”.

XV. Explanations on Tangible Fixed Assets

Tangible fixed assets are carried at cost which includes acquisition costs and other direct costs bared necessary for the assets to become ready for use, and if results of appraisal reports exceed the costs, they are not subject to any revaluation. Subsequent to recognition, tangible fixed assets are presented in financial statements at cost less any accumulated depreciation and accumulated impairment losses, if any.

Gain or loss arising from the disposal or retirement of an item of tangible fixed assets is determined as the difference between the sales proceeds and the carrying amount of that asset and is recognized in profit or loss.

Ordinary maintenance and repair expenses of tangible fixed assets items are recognized as expenses. Investment expenditures that increase the future benefit by enhancing the capacity of tangible assets are capitalized. Investment expenditures include cost items that extend the useful life of the asset, increase the servicing capabilities of the asset, improve the quality of goods or services produced or reduces the costs. There is no pledge, mortgage and other restriction on the tangible fixed assets or given for the purchase commitments or any restrictions on the rights for the use of these.

Tangible fixed assets are amortised by using the straight-line method over their estimated useful lives. Estimated depreciation rates of tangible fixed assets are as follows.

	<u>Estimated Useful Life (Years)</u>	<u>Depreciation Rate (%)</u>
Building	50	2
Safes (vaults)	50	2
Vehicles	5	20
Other Tangible Assets	3-15	6,66-33,33

There is no change in economic depreciation estimations that has material effect in the current period or that is expected to have effect in the subsequent periods.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVI. Explanations on Leasing Transactions

The “IFRS 16 Leases” Standard was published in the Official Gazette dated 16 April 2018 and numbered 29826 to be applied as of 1 January 2019.

The Parent Bank as a Lessee:

The “IFRS 16 Leases” Standard removes financial lease and operational lease distinction for lessees and introduces a single accounting model for all leasing transactions. According to the standard, the lessees reflect a “asset that gives the right to use” and a “lease obligation” to the financial statements at the date when the lease begins. The initial cost of the asset that gives the right to use is measured by deducting the lease incentives from the sum of the lease obligation and the initial direct costs incurred by the lessees. The cost method is used for the measurements after the beginning of the lease. In this method, the asset that gives the right to use is measured by deducting the accumulated depreciation and accumulated depreciation provisions from the cost value. The lease obligation is initially measured at the present value of the lease payments to be made during the lease period. In subsequent measurements, the book value of the liability is increased to reflect the interest on the lease obligation and decreased to reflect the lease payments made. IFRS 16 has made exemptions for leases of 12 months or less and leases related to low value assets.

The Group, which is a lessee in financial leasing transactions, accounts for all lease transactions longer than 12 months as assets and liabilities in the statement of financial position. Depreciation expense related to the leased asset and interest expense in lease payments are reported in the statement of profit or loss. The lease obligation was initially measured at the present value of the lease payments to be made during the lease period using the Group’s TL alternative source cost.

The Parent Bank as a Lessor:

According to the “IFRS 16 Leases” Standard, financial lease and operational lease distinction continues for the lessor. If the lessor transfers the significant risks and benefits arising from ownership of the asset subject to the lease to the lessee, he will classify it as a financial lease. Other leases will be classified as operational leases. The receivables that arise from leasing the assets of the Bank, which are not included in financial lease transactions and which are not used in banking transactions, are followed up in the receivables from the leasing transaction and are accounted on an accrual basis.

XVII. Explanations on Provisions and Contingent Liabilities

In the consolidated financial statements, a provision is made for an existing commitment resulted from past events if it is probable that the commitment will be settled, and a reliable estimate can be made of the amount of the obligation.

Provisions other than the expected credit loss set for loans and other receivables and contingent liabilities are accounted for in accordance with ‘Turkish Accounting Standard on Provisions, Contingent Liabilities and Contingent Assets’ (TAS 37).

For transactions that can affect financial structure, provisions are provided by using the existing data if they are accurate, otherwise by using the estimates.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVIII. Explanations on Employee Benefit Liabilities

Obligations for employee benefits are recognized in accordance with the TAS 19 “Employee Benefits”.

Under the Turkish legislation as supplemented by union agreements, lump sum payments are made to all employees who retire or whose employment is terminated without due cause. In accordance with the working status of the Group and the social security institution legislation, the retirement pension is related to the ones related to the Law No: 5434 and the severance payment is calculated to those related to the Law No: 4857.

The principal assumption is that the maximum liability for each year of service will increase parallel with inflation. Thus, the discount rate -unless it is negative- applied represents the expected real rate after adjusting for the anticipated effects of future inflation. Consequently, in the accompanying financial statements as of 31 December 2025, the provision has been calculated by estimating the present value of the future probable obligation of the Bank arising from the retirement of the employees. The provisions at the respective balance sheet date have been calculated with a discount rate of 4,25% (31 December 2024: 3,01%). The maximum amount of full TL 64.948,77 effective from 1 January 2026 has been taken into consideration in calculation of provision for employment termination benefits (31 December 2024: full TL 46.655,43).

XIX. Explanations on Taxation

Current Tax:

In the first paragraph of Article 32 of the Law No. 5520 titled “Corporate Tax and Provisional Tax Rate”, regarding the enforcement of Article 21 of the “Law on the Amendment of Additional Motor Vehicles Tax for Compensation of Economic Losses Caused by the Earthquakes Occurring on 6 February 2023 and Amendments to Some Laws and the Decree Law No. 375”, which came into force by being published in the Official Gazette dated 15 July 2023 and numbered 32249, starting from the declarations that must be submitted as of 1 October 2023, corporate income tax rate to be applied to corporate earnings for the 2023 and subsequent taxation periods is 30% for banks, financial leasing, factoring, financing and savings financing companies, electronic payment and money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies. The corporate tax rate is applied to the tax base to be found as a result of adding the non-deductible expenses to the commercial earnings of the companies, the exemption (such as the participation earnings exemption) and the deduction of the deductions in the tax laws. No further tax is paid if the profit is not distributed. Non-resident corporations’ income through a permanent establishment or permanent representative in Türkiye and dividends paid to companies’ resident in Türkiye (dividends) not subject to withholding. Dividend payments made to individuals and institutions other than these are subject to 10% withholding tax. Addition of profit to capital is not considered as profit distribution and withholding tax is not applied.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XIX. Explanations on Taxation (Continued)

Current Tax (Continued):

Corporations are required to pay advance corporate tax quarterly on their corporate income. Advance tax is declared by the 17th and paid by the 17th day of the second month following each calendar quarter end. Advance tax paid by corporations for the current period is credited against the annual corporation tax calculated on the annual corporate income in the following year.

Despite the offset, if there is temporary prepaid tax remaining, this amount can be refunded in cash or can be offset against other financial debts to the state. According to Real Estate Sales Exemption in the Article 5.1.e. of Corporate Tax Law which is one of the important tax exemptions applied by the Bank, a 50% exemption is applied to the profits arising from the sale of real estate that has been in the assets of institutions for at least two full years (730 days), while exemption rate is 25% for profits arising from sales of real estate that has been in the assets of institutions before 15 July 2023, the date of entry into force of the Law No. 7456; within the scope of this article Corporate Tax exemption will not be applied to real estate acquired after 15 July 2023.

The 75% exemption from corporate tax for the gains arising from the sale of founders' shares, redeemed shares and preemptive rights that are hold for the same period as participation shares was reduced to 50% by the Presidential Decree No. 9160 published in the Official Gazette dated 27 November 2024 and numbered 32735. This exemption applies to the period the sale is made and the part of return on sales that benefits from the exemption is held in a special fund in the liabilities account until the end of the fifth year started from the following year sale is made. However, the sales payment must be collected until the end of the second calendar year following the year in which the sale is made. Taxes which are not realized in time due to the exemption that hits uncollected sales payment are considered as tax loss. Taxes which does not accrue on time because the applying exemption for the transfer of the exempted part of revenue to the other accounts with other ways out of capitalizing in five years or withdrawn from company or transferring from limited taxpayer corporations to the headquarters, are considered as tax loss. This is also be applicable in the condition of liquidation of business (Except transfers and divisions that make according to this code).

Moreover, according to 5.1.f. article of Corporation Tax Law; corporations which have been fallen to legal proceedings because of owe to the bank or Savings Deposit Insurance Funds, and their warrantors' real estates, participation stocks, founding bonds, redeemed shares, options to call of mortgagors' revenues that used for against debts or transferring to SDIF, 50% for real estates, and 75% for others are exempted from Corporation tax.

Under the Turkish Corporate Tax Law, losses can be carried forward to offset against future taxable income for up to five years. Losses cannot be carried back to offset profits from previous periods. In Türkiye, there is no procedure for a final and definitive agreement on tax assessments with tax authorities.

The fourth provisional tax period for Corporate Tax, which had been abolished in 2022, has been reinstated through the amendment made to Article 120/Repeated of the Income Tax Law, titled 'Provisional Tax', by Article 2 of Law No. 7566, published in the Official Gazette dated 19 December 2025 and numbered 33112. Accordingly, taxpayers' taxable income will now be determined based on 3-, 6-, 9- and 12-month periods, and a provisional tax return will be submitted for the last quarter of the year. Within this scope, corporations whose accounting period corresponds to the calendar year will submit a provisional tax return for the October–December period of 2025.

With the "Tax Procedure Law and the Law on Amendments to the Corporate Tax Law" adopted on the agenda of the Grand National Assembly of Türkiye on 20 January 2022, inflation accounting has been decided to be implemented starting from the balance sheet dated 31 December 2023.

Regulations regarding the implementation of Inflation Accounting were determined with the Tax Procedure Law Communiqué No. 555, which entered into force after being published in the Official Gazette No. 32415 dated 30 December 2023. Valuation differences for 2023 will be transferred to equity and will not be associated with the statement of profit or loss. Previous year's profit resulting from inflation correction of the balance sheet at the end of the 2023 accounting period (determined after correction) will not be subject to tax and previous year's losses will not be accepted as loss.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XIX. Explanations on Taxation (Continued)

Current Tax (Continued):

On the other hand, in accordance with Article 17 of Law No. 7491 dated 28 December 2023 and numbered 32413, “Banks, companies within the scope of the Financial Leasing, Factoring, Financing and Savings Financing Companies Law No. 6361 dated 21 November 2021, payment and electronic money institutions, authorized foreign exchange institutions, asset management companies and capital markets, the profit/loss difference resulting from the inflation adjustment made in the 2024 and 2025 accounting periods will not be taken into account in determining the earnings. The President is authorized to extend the periods determined within the scope of this paragraph by one accounting period, including provisional tax periods.” With the foresaid provision valuation differences resulting from the inflation adjustment will not affect the tax base.

With the Tax Procedure Law General Communiqué (Sequence No: 582) published in the Official Gazette dated 15 February 2025 and numbered 32814, it is stated that the taxpayers within the scope will not make inflation adjustment in the first, second and third provisional tax periods of the 2025 accounting period and will not attach a balance sheet to the provisional income/corporate tax returns to be submitted for these periods.

With Article 34 of the Law No. 7571 titled ‘Law on Amendments to the Turkish Penal Code, Certain Laws and Decree Law No. 631’, published in the Official Gazette dated 25 December 2025 and numbered 33118, a provisional article was added to the Tax Procedure Law No. 213 dated 4 January 1961. Pursuant to this provisional article, for the 2025 fiscal year including provisional tax periods, and for the 2026 and 2027 fiscal years (and for taxpayers with a special accounting period, for the fiscal years ending in 2026, 2027 and 2028), financial statements shall not be subject to inflation adjustment, regardless of whether the conditions for inflation adjustment set forth under Article 298/Repeated are met.

Article 32/C titled “Domestic minimum corporate tax” has been added to the Corporate Tax Law with Article 36 of Law No. 524 and according to the explanations made in Article 13 of the Communiqué Amending the Corporate Tax General Communiqué Serial No. 1 regarding the said provision, the corporate tax calculated on the earnings obtained in 2025 and the following taxation periods will not be less than 10% of the corporate income before deducting deductions and exemptions, taking into account the relevant provisions.

According to Turkish tax legislation, financial losses shown on the declaration can be deducted from the period corporate income for a period not exceeding 5 years. However financial losses can not be offsetted from last year's profits. In Türkiye, there is no practice of reaching an agreement with the tax authority regarding the taxes to be paid.

Corporate tax declarations are submitted to the relevant tax office by the evening of the 30th day of the fourth month following the month in which the accounting period is closed, and the accrued tax is paid by the evening of the 30th day. However, the authorities authorized for tax inspection may examine the accounting records within five years, and if erroneous transactions are detected, the tax amounts to be paid may change.

Deferred Tax

In accordance with TAS 12 “Turkish Accounting Standard Relating to Income Tax”, the Bank calculates and recognizes deferred tax for temporary differences between the bases calculated based on the accounting policies used and valuation principles and that calculated under the tax legislation. Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences. However, deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized as deferred tax liability or asset if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XIX. Explanations on Taxation (Continued)

Deferred Tax (Continued):

The carrying amount of a deferred tax asset is reviewed on each balance sheet date. Carrying amount of a deferred tax asset can be reduced to the extent that it is no longer probable that enough taxable profit will be available to allow all or part of the asset to be recovered. Deferred tax asset and liability are calculated with the valid tax ratios for the related period. Within the scope of the Law No. 7456 published in the Official Gazette dated 15 July 2023 and numbered 32249, deferred tax calculations were made by taking into account the 30% corporate tax rate to be applied for banks and certain financial institutions.

Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is associated directly with equity. Deferred tax asset and deferred tax liability are presented as net in these financial statements.

The income tax charge is composed of the sum of current tax and deferred tax charges. The current tax liability is calculated over taxable profit for the year. Taxable profit differs from profit as reported in the statement of profit or loss because it excludes items of income or expense that are taxable or deductible and it further excludes items that are never taxable or deductible.

According to the second paragraph of the Article 53 of the Banking Act No: 5411, all specific reserves for loans and other receivables are considered as deductible expense for determining corporate tax base.

The current tax payable is offset with prepaid tax, if they are associated with. Deferred tax assets and liabilities are also offset. Deferred tax calculation is made within the scope of TFRS 9 for the first and second stage provisions.

Transfer Pricing:

Transfer pricing is regulated through Article 13 of Corporate Tax Law titled “Transfer Pricing Through Camouflage of Earnings”. Detailed information for the practice regarding the subject is found in the “General Communiqué Regarding Camouflage of Earnings Through Transfer Pricing”. According to the aforementioned regulations, in the case of making purchase or sales of goods or services with relevant persons/corporations at a price that is determined against “arm’s length principle”, the gain is considered to be distributed implicitly through transfer pricing and such distribution of gains is not subject to deductions in means of corporate tax.

XX. Additional Explanations on Borrowings

The Parent Bank accounts its debt instruments in the subsequent periods, by using the effective interest rate method. The Bank has no borrowings that require hedging techniques for accounting and valuation of debt instruments and liabilities representing the borrowings.

The Parent Bank continues its financial support that it provided and still providing by acquiring sources from domestic and international markets. Domestic resources are provided from Central Bank of the Republic of Türkiye, international organizations such as Islamic Development Bank, KfW Development Bank and OPEC International Development Fund through the Ministry of Treasury and Finance. In addition to these, the Bank may acts as an intermediary for the use of various budget-sourced funds domestically. The loan from this source has been disbursed and no new funds have been transferred from the Ministry of Treasury and Finance. The funds provided are recorded in the Bank's resource accounts on the transfer date. The maturity and interest rates of these funds are determined by the public authority through Investment Incentives Communiqués.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XX. Additional Explanations on Borrowings (Continued)

The present foreign funds of the Bank are medium and long term loans from World Bank, European Investment Bank, Council of Europe Development Bank, Islamic Development Bank, International Islamic Trade Finance Corporation, Black Sea Trade and Development Bank, Japan Bank for International Cooperation, Asian Infrastructure Investment Bank, KfW Development Bank, China Development Bank and the securities issued as allocated to French Development Agency are recorded to related accounts on the date and with the cost of procurement.

The Parent Bank generally prefers providing loans in parallel to the borrowing terms like maturity date, interest rate, interest type and currency type to avoid maturity, exchange rate and liquidity risks.

The Parent Bank has not issued any convertible bonds.

XXI. Explanations on Shares Issued

The Bank's issued capital was increased from TL 5.500.000 to TL 10.000.000 on 18 June 2025 by issuing shares with a nominal value of TL 4.500.000 in the current period.

XXII. Explanations on Bill Guarantees and Acceptances

Commitments regarding bill guarantees and acceptances of the Parent Bank are presented in the “Off Balance Sheet” commitments. In the current and previous period, the Parent Bank has no bills and acceptances.

XXIII. Explanations on Government Incentives

There are no government incentives utilized by the Group in the current and prior period.

XXIV. Earnings Per Share

Earnings per share disclosed in the statement of profit or loss are determined by dividing net profit/loss by the weighted average number of shares in issue during the year concerned.

	Current Period (31.12.2025)	Prior Period (31.12.2024)
Net Profit for the Period	9.006.859	6.175.535
Weighted Average Number of Ordinary Shares Issued (Thousand)	791.643.836	450.819.672
Earnings Per Share (in Full TL)	0,01138	0,01370

In Türkiye, companies can increase their share capital by making a pro-rata distribution of “bonus shares” to existing shareholders from retained earnings. For the purpose of earnings per share computations, such “bonus share” distributions are treated as issued shares. Accordingly, the weighted average number of shares used in these calculations is calculated by taking into consideration the retrospective effects of such share distributions. In the event that the number of issued shares increases after the balance sheet date due to the distribution of bonus shares before the date of preparation of the financial statements, earnings per share is calculated by taking into account the total number of new shares.

XXV. Related Parties

For the purpose of these financial statements, shareholders, senior executives and Board members, their families and companies controlled or affiliated by them, as well as subsidiaries and joint ventures subject to joint management have been accepted as related parties within the scope of the TAS 24 Related Party Disclosures Standard. Transactions with related parties are shown in footnote VII of Section Five.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XXVI. Explanations on Segment Reporting (Continued)

As part of its mission, the Parent Bank operates mainly in the areas of corporate banking and investment banking. Corporate banking provides financial solutions and banking services to customers with medium and large joint stock company status. Services offered include investment loans, project finance, TL and foreign exchange business loans, letters of credit and letters of guarantee. The Bank generates almost all of its income from domestic markets.

Within the scope of investment banking activities, the Bank's treasury bills, government bond trading, repo transactions, money swaps and forward foreign exchange transactions, capital markets consultancy, financial consultancy, merger and purchase consultancy are performed. Among the investment banking operating income, revenues from Treasury transactions activities are included.

As of 31 December 2025, explanations in line with segment reporting are shown below.

	Investment Banking (Treasury)	Corporate Banking	Other	Total Operations of the Group
Current Period (31.12.2025)

SECTION FOUR

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT

I. Explanations Related to Consolidated Equity

Consolidated equity amount and capital adequacy standard ratio are calculated within the framework of ‘Regulation Regarding Equities of Banks’ and ‘Regulation Regarding Measurement and Evaluation of Banks’ Capital Adequacy’.

The Group’s equity amount as of 31 December 2025 is TL 38.635.351 (31 December 2024: TL 24.238.319) and its capital adequacy ratio is 21,85% (31 December 2024: 17,98%). The capital adequacy ratio of the Group is above the minimum ratio determined by the relevant legislation.

Information on Equity Items:

	Current Period (31.12.2025)	Prior Period (31.12.2024)
Common Equity Tier I Capital		
Paid-in capital following all debts in terms of claim in liquidation of the Bank	10.206.074	5.706.074
Share issue premiums	6.247	5.421
Reserves	14.188.755	8.012.952
Gains recognized in equity as per TAS	289.937	136.994
Profit	9.006.859	6.175.535
Net profit for the period	9.006.859	6.175.535
Prior periods’ profit	-	-
Shares acquired free of charge from subsidiaries, affiliates and jointly controlled partnerships and cannot be recognized within profit for the period	10.931	10.931
Minority Shares	-	-

Information on Consolidated Equity Items (Continued):

Items to be Deducted from the Sum of Tier I and Tier II Capital (Capital) During the Transition Period	-	-
The portion of total of net long positions of the investments in equity items of unconsolidated banks and financial institutions where the bank owns 10% or less of the issued share capital exceeding the 10% threshold of above Tier I Capital not deducted from Tier I Capital, Additional Tier I Capital or Tier II Capital as per the Temporary Article 2, Clause 1 of the Regulation	-	-
The portion of total of net long positions of the investments in equity items of unconsolidated banks and financial institutions where the bank owns more than 10% of the issued share capital exceeding the 10% threshold of above Tier I Capital not deducted from Additional Tier I Capital or Tier II Capital as per the Temporary Article 2, Clause 1 of the Regulation	-	-
The portion of net long position of the investments in equity items of unconsolidated banks and financial institutions where the bank owns 10% or more of the issued share capital, of the net deferred tax assets arising from temporary differences and of the mortgage servicing rights not deducted from Tier I Capital as per the Temporary Article 2, Clause 2, Paragraph (1) and (2) and Temporary Article 2, Clause 1 of the Regulation	-	-
CAPITAL		
Total Capital (Total of Tier I Capital and Tier II Capital)	38.635.351	24.238.319
Total Risk Weighted Amounts	177.758.306	134.789.354
CAPITAL ADEQUACY RATIOS		
Consolidated CET I Capital Ratio (%)	18,63	14,44
Consolidated Tier I Capital Ratio (%)	19,48	15,55
Capital Adequacy Ratio (%)	21,74	17,98
BUFFERS		
Total additional Common Equity Tier I Capital requirement ratio	2,5	2,5
Capital conservation buffer ratio (%)	2,5	2,5
Bank-specific counter-cyclical capital buffer ratio (%)	-	-
Systemic significant bank buffer ratio (%)	-	-
The ratio of additional Common Equity Tier I Capital which will be calculated by the first paragraph of the Article 4 of Regulation on Capital Conservation and Countercyclical Capital Buffers to Risk Weighted Assets (%)	-	-
Amounts Lower Than Excesses as per Deduction Rules	-	-
Portion of the total of net long positions of investments in equity items of unconsolidated banks and financial institutions where the Bank owns 10% or less of the issued share capital	-	-
Portion of the total of net long positions of investments in Common Equity Tier I Capital items of unconsolidated banks and financial institutions where the Bank owns more than 10% of the issued share capital	-	-

Information on borrowing instruments to be included in the consolidated equity calculation:

Current Period (31.12.2025)	
Issuer-Loan supplier	Bank / Republic of Türkiye Ministry of Treasury and Finance
Identifier (CUSIP, ISIN etc.)	-
Governing law (s) of the instrument	BRSA
Regulatory treatment	
Subject to 10% deduction as of 1/1/2015	No
Eligible on unconsolidated and /or consolidated basis	Unconsolidated and Consolidated
Instrument type	Loan
Amount recognized in regulatory capital (Currency in TL million, as of most recent reporting date)	2.826
Nominal value of instrument (TL million)	2.826
Accounting classification of the instrument	Liabilities Subordinated Loan
Original date of issuance	31.12.2018
Maturity structure of the instrument (perpetual/dated)	Perpetual
Starting maturity of the instrument	-
Issuer call subject to prior supervisory (BRSA) approval	Yes
Call option dates, conditioned call dates and call amount	-
Subsequent call dates, if applicable	-
Interest / dividend payments	
Fixed or floating coupon/dividend payments	-
Interest rate and related index value	-
Existence of any dividend payment restriction	-
Fully discretionary, partially discretionary or mandatory	-
Existence of step up or other incentive to redeem	-
Noncumulative or cumulative	-
Convertible into equity shares	
If convertible, conversion trigger(s)	-
If convertible, fully or partially	-
If convertible, conversion rate	-
If convertible, mandatory or optional conversion	-
If convertible, type of instrument convertible into	-
If convertible, issuer of instrument to be converted into	-
Write-down feature	
If bonds can be written down, write down trigger(s)	-
If bond can be written-down, full or partial	-
If bond can be written-down, permanent or temporary	-
If temporary write-down, description of write-up mechanism	-
Position in subordination hierarchy in case of liquidation (instrument type immediately senior to the instrument)	After borrowings, before the additional capital, same as Tier II Capital
In compliance with article number 7 and 8 of Regulation on Bank Capital	Complies with the requirements of Article 8 of the Regulation on Equity of Banks.
Details of incompliances with article number 7 and 8 of Regulation on Bank Capital	Complies with the requirements of Article 8 of the Regulation on Equity of Banks.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

II. Explanations Related to Consolidated Credit Risk

Credit risk refers to the possibility of losses that the Parent Bank may incur due to the loan customer's inability to fulfill its obligations partially or completely on time by not complying with the requirements of the concluded contract. The Bank ensures that credit risk is managed in accordance with the volume, nature and complexity of its loans within the framework of the legal regulations and restrictions of the BRSA, taking into account the best practices.

The most basic banking service that the Parent Bank uses to finance medium and long term investments, which is its main function, is “project evaluation-based lending activity”. Taking into account the proportional size within the balance sheet structure, credit risk constitutes the most important risk item of the Bank.

The general principle of the risk policies to be followed by the Parent Bank is to specialize in the activities that are in accordance with the tasks, vision and structure determined by the Establishment Law, to take risks that can be defined, controlled and/or managed in this sense, to make an effort not to take risks other than the risks that occur due to the structure of its activities and are inevitable. Based on the basic principle of ensuring that the risks to be taken in this context are also defined and manageable risks, the Bank has only manageable risks depending on the sensitivity shown to ensure that credit facilities are compatible with the credit source conditions, except for the credit risk and counterparty risk that occur and are unavoidable due to the need for lending.

In the Parent Bank that has a fully functioning mechanisms based on activities, actively used committees and risk budgeting practices in decision-making and risk management processes, Credit Evaluation Committee continues its activities in order to determine the procedures and principles of the Bank's crediting, to evaluate the projects to be credited within the scope of the Bank's Environmental and Social Policy, to ensure coordination between the units in charge of credit transactions, to assess credit risk and the condition of the loan portfolio, to take decisions on loan allocation, postponement of loan receivables, installments, reorganization of conditions, the procedures and principles regarding the Bank's loan policies, to increase the efficiency of the loan portfolio within the framework of changing and developing conditions and to determine strategies for customers in trouble / legal follow-up.

The majority of the Parent Bank's loan placements are allocated with the approval of the Credit Evaluation Committee and the Board of Directors in accordance with the reports prepared by the Financial Analysis and Valuation Unit and the Credit Allocation Unit in accordance with the relevant legal regulations. Since the Bank's placements are in the form of project financing, the amount of loans that can be extended to a company is mainly determined as a result of project evaluation studies, and loan disbursements are made in a controlled manner and by monitoring expenditures.

As for the companies that have been granted loans by the Parent Bank, whose loans have been postponed or connected to the payback plan, the financial data of the companies are regularly monitored until the collection and liquidation of the risk is completed. For companies whose risk exceeds a certain amount or where there is a need for on-site inspection, inspection and determination are carried out both at the company headquarters and at the site of the facility. A Monitoring Report is being prepared, including the recommendations developed as a result of the reviews and evaluations.

The credit worthiness of the borrowers of loans and other receivables is monitored regularly in accordance with the relevant legislation, and in case of an increase in the risk level of the loan borrower, the credit limits are reviewed and additional collateral is obtained if necessary.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

II. Explanations Related to Consolidated Credit Risk (Continued)

In the utilization of the provided resources, the sectors suitable for the borrowing conditions are determined and credited. By monitoring the sectoral distribution of loan customers, this distribution is taken into account in placement decisions and goals.

The Parent Bank ensures that credit risk is managed in accordance with the volume, nature and complexity of its loans within the framework of the legal regulations and restrictions of the BRSA, taking into account the best practices. The Bank provides the identification, measurement and management of the credit risks contained in all of its products and activities, without being limited to credit products only. The issue of whether the credit decision support systems are compatible with the structure, size and complexity of the Parent Bank's activities is constantly reviewed, developed and adjustments are made to the system when necessary by the Board of Directors.

The Parent Bank is registered under Article 54 of the Banking Law No. 5411. it is not subject to the general credit restrictions defined in the article. However, in the Bank's "Loans Policy" and "Risk Limits and Application Principles" documents, it has defined loan restrictions parallel to the restrictions contained in the law. In order to determine the level of credit risk that the Bank may face, the Risk Management Unit actively participates in the measurement, analysis and monitoring process and regularly reports to the Board of Directors and the Audit Committee to Senior Management.

Within the framework of the policies determined within the scope of the BRSA Accounting and Financial Reporting Legislation;

The Parent Bank evaluates its financial assets in 3 stages within the scope of TFRS 9. In this context, for defaulted loans (3.Stage) and loans that have not yet defaulted, but which have significantly increased credit risk of the loan's disbursement (2.Stage), the Parent Bank calculates the expected lifetime credit loss. For other financial assets covered by TFRS 9 (1.Stage) the Bank reflects the calculation containing the probability of default within 12 months after the reporting date as the expected loss provision.

Futures and other derivative product transactions are carried out at the Bank within the framework of asset-liability management, taking into account the legal limits. The credit risk assumed due to such transactions is managed together with the potential risks arising from market movements. There is no option agreement in the Parent Bank.

In accordance with the TFRS 9 Policy approved by the Board of Directors, the Bank allocates provisions as stipulated in the "Regulation on the Classification of Loans and the Procedures and Principles Related to the Provisions to be Allocated for Them" and the "Communiqué on the Turkish Financial Reporting Standard for TFRS 9 Financial Instruments".

Conditional and unconditional receivables secured by real estate property	6.372.342	6.027.171	5.484.131	3.340.207
Overdue receivables	55.269	121.104	156.399	239.745
Receivables defined in high risk category by BRSA	-	-	-	-
Receivables as a collective investment establishment	259.449	252.463	224.359	237.077
Other receivables	1.322.431	1.198.636	1.060.929	944.709

(*) Includes risk amounts before the effect of credit risk mitigation but after the credit conversions.

Restructured loans whose amortization schedule has been changed are followed in the accounts which are specified by related regulations and monitored in accordance with the Parent Bank Bank's credit risk policies. Accordingly, commercial activities of debtors are analyzed and repayments are monitored whether they are in line with the repayments schedules or not, and necessary precautions are taken.

Since the Parent Bank does not have any risks within the scope of private sector loans and trading accounts in banking accounts in other countries, cyclical capital buffer is not calculated.

a) The share of the Parent Bank's receivables from the first 100 and 200 cash loan customers in the total cash loan portfolio is 92,43% and 99,67%, respectively (31 December 2024: 91,70% and 99,43%).

b) The share of cash and non-cash receivables from the Parent Bank's first 100 and 200 loan customers in total on-balance sheet and off-balance sheet assets is 57,34% and 61,63%, respectively (31 December 2024: 57,99% and 62,61%).

c) The share of the Parent Bank's receivables from the first 100 and 200 non-cash loan customers in the total non-cash loan portfolio is 100% (31 December 2024: 100%).

The allocated expected credit loss provision for 1. and 2. Stage is TL 1.046.885 (31 December 2024: TL 1.126.705).

The expected loss provisions were not taken into account in the calculation of the above-mentioned ratios.

II. Explanations Related to Consolidated Credit Risk (Continued)

Miscellaneous Information According to Important Sectors or Counterparty Type:

The Parent Bank classifies its loans and allocates provisions within the framework of TFRS 9 Policy approved by the Board of Directors. In this context, for impaired loans the Bank calculates lifetime expected credit loss and reflects it as provision when the credit risk of the loan has not yet gone into default but has increased significantly from the date of disbursement (Stage 2) and in case of default (Stage 3).

The Bank has determined the “Significant Increase in Credit Risk” and “Classification” criteria in the TFRS 9 Provisions Methodology document approved by the Board of Directors, and its loans are classified and provisions are set aside in line with these criterias.

Current Period (31.12.2025) Major Sectors / Counterparties	Loans		Provisions

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

II. Explanations Related to Consolidated Currency Risk

The Parent Bank is exposed to currency risk because of inconsistency of the foreign currency denominated asset and liability balances with respect to the transactions made in foreign currencies.

The currency risk management policy of the Bank is defined as, keeping the “Foreign Currency Net General Position/Equity Standard” ratio within the legal boundaries with respect to the economic matters, trends in the market and financial position of the Parent Bank. By keeping up with this main goal and with respect to asset and liability management, foreign currency denominated assets are appreciated with the most favorable interest rates in the foreign currency market.

Currency risk is calculated within the scope of the standard method used for legal reporting.

Besides, the exchange rate risk faced by the Parent Bank daily is determined by preparing the foreign currency balance sheet by covering individual positions. Proforma foreign currency balance sheets are used for the measurement of the future exchange rate risks (including foreign currency-indexed assets and liabilities).

The Parent Bank has no hedging derivative instruments for foreign currency denominated borrowings and net foreign currency investments.

A non-speculative foreign exchange position management policy is followed in order to limit the exposure of the currency risk. In this respect, distribution of foreign currency denominated on balance sheet and off-balance sheet items are considered.

In order to reduce the risk of foreign exchange rate fluctuations affecting the financial structure of the Bank, the risk of foreign exchange rate of the Parent Bank is determined based on the Foreign Currency Net General Position/Equity ratio determined by the BRSA. The limit of the ratio has been determined as 10% effective from the decision date, as of the BRSA’s decision dated 9 March 2023 and numbered 10534.

The foreign exchange buying rates of the Parent Bank as of the date of the financial statements and the last five business days prior to that date are as follows:

<u>Date</u>	<u>USD</u>	<u>EURO</u>	<u>100 JPY</u>
31/12/2025	42,8933	50,3524	27,4429
30/12/2025	42,8881	50,5136	27,5065
29/12/2025	42,8800	50,4355	27,4784
26/12/2025	42,7896	50,3805	27,4768
25/12/2025	42,7715	50,3634	27,4793

The simple arithmetic average value of the Bank’s foreign exchange purchase rate for the last thirty days from the date of the financial statements is USD: 42,6261 TL, Euro: 49,9224 TL, CHF: 53,5424 TL.

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

IV. Explanations Related to Consolidated Interest Rate Risk

The interest rate risk indicates the probability of loss that the Parent Bank may incur due to the position of the financial instruments due to movements in the interest rates. Changes in interest rates affect the return on the assets and the cost of the liabilities. Interest rate risk arising from banking accounts, includes re-pricing risk, yield curve risk, base risk and optionality risk.

The interest rates determined by the market actors, especially the central banks, have a decisive role on the economic value of the Parent Bank's balance sheet and on the Parent Bank's income-loss balance. Sudden interest rate shocks in the market causes the gap between the interest rate applied to the Parent Bank's yielding assets and the interest rate paid to the cost-effective liabilities to be opened. The opening of this gap may cause the Parent Bank interest income to be adversely affected by fluctuations in market interest rates and may cause decrease in profitability of the Parent Bank.

The Parent Bank's basic principle in the interest rate risk management policy is to avoid mismatch and provide alignment between loans disbursed with fixed and floating rate and funds provided with fixed and floating rate. Accordingly, interest rate, currency and maturity alignment are respected during the disbursement of loans funded by foreign long-term borrowings, which form the material part of the loan portfolio. Almost the entire loan portfolio is financed by floating rate borrowings, thus interest rate risk from changes in interest rates seems not probable for the loan portfolio because of the correlation provided between the sources and the uses and other loans in the portfolio are financed by the equity of the Parent Bank.

Within the framework of the Parent Bank's basic principle of interest rate risk policy, optimization of portfolio distribution in the management of interest-sensitive assets other than loans is provided by considering possible changes in duration of positions and current interest rate limits; by taking into account alternative return, limits of tolerable loss and risk. In this context, to measure the interest rate risk exposure of the Parent Bank, the effect of days to maturity and profit/loss are analyzed considering the scenarios of possible changes in interest rates for securities portfolio. Alternatives for compensation of probable losses that may arise as a result of fluctuations in interest rates are examined using different markets. Interest rate sensitivity analysis is also made for the positions besides securities portfolio.

There is no interest rate mismatch on loan portfolio as the main principle of interest rate adjustment on the source and disbursement side of the loan portfolio of the Parent Bank. For this reason, the Parent Bank's credit portfolio does not carry any interest rate risk even if it is affected by market volatility. Interest rate-sensitive items on the Parent Bank's balance sheet are limited only to the size of the Financial Assets Measured at Fair Value Through Other Comprehensive Income within the liquid portfolio.

In order to minimize the possibility of unfavorable effects of market interest rate changes on the Parent Bank's financial position, risk limits are used for the management of interest rate risk. These limits are set by Asset-Liability Committee and approved by Board of Directors. Parent Bank monitors and controls whether interest-sensitive assets are within the determined limits.

In order to minimize the likelihood that the change in market interest rates in the Parent Bank's securities portfolio management will cause adverse effects on the financial structure of the Parent Bank, limits have been set on the adjusted duration of the securities portfolio and the amount of daily loss that may arise from the securities portfolio.

IV. Explanations Related to Consolidated Interest Rate Risk (Continued)

Within the scope of the interest rate limits, the BHFoR early warning limit has been determined with a more cautious approach based on the legal ratio of “Standard Ratio for Interest Rate Risk Arising from Banking Accounts”, which is determined as 15% by the BRSA regarding the measurement and evaluation of interest rate risk arising from banking accounts with the standard method.

V. Explanations Related to Position Risk of Equity Securities

None.

VI. Explanations Related to Liquidity Risk Management, Liquidity Coverage Ratio and Net Stable Funding Ratio

1. Explanations on Consolidated Liquidity Risk Management:

The Parent Bank's liquidity management is managed by Treasury Department in coordination with related departments and the strategies constituted by Asset Liability Committee as part of "Risk Management Strategies, Policies and Application Principles" that is approved by the Board of Directors. The liquidity risk management as per the implementation principles are stated as follows:

Liquidity risk refers to the probability that the Parent Bank will incur the consequential loss that it cannot anticipate or face unforeseeable, all cash flow requirements without affecting the day-to-day operations or financial structure.

Liquidity risk also represents the possibility of loss due to the Parent Bank's inability of settling with market prices since the lack of depth and excessive fluctuations in the market.

The main policy of Liquidity Risk Management in the Parent Bank is to provide quality asset structure in which any liabilities can be fulfilled. Since the Parent Bank is specialized, its liquidity need is more predictable as compared to commercial banks and ensures cash flows provided for its liabilities more regularly.

The type, maturity structure and compliance of interest rates of assets and liabilities in the balance sheet, is assured within the framework of the Asset Liability Committee's decisions. The Parent Bank keeps liquidity ratios within risk limits as set out in legal legislation and follows regularly.

In order to manage liquidity risk, proforma cash flows are set on the basis of predictable data by evaluating the maturities of asset and liability structure. Proper placement of liquidity excess considering alternative gains and meeting liquidity needs with the most appropriate cost of funding is essential.

Additionally, monthly proforma cash flows and balance sheet durations regarding the fulfilment level of medium- and long-term liabilities are traced in order to determine early factors that generate risk.

Mainly for risk measurement and monitoring activities to determine the level of liquidity risk;

The liquidity risk of the Parent Bank is calculated by using "Liquidity Analysis Forms" in accordance with the format determined by the BRSA and reported to the BRSA on a weekly and daily basis.

Limits on liquidity risk are determined under; the legal limitations set out by the BRSA and the "Liquidity Emergency Plan Directive of the Bank". The Parent Bank's "Liquidity Emergency Plan Directive" came into force with the decision of the Board of Directors dated 21 December 2022 and numbered 2022-20-11/287. Situations that require the implementation of the Liquidity Emergency Plan are followed by indicators derived from bank-specific (internal) and financial market developments. The Liquidity Emergency Plan includes actions to ensure that the Parent Bank fulfills its obligations at its current level and to maintain liquidity at the level required by the Bank or to achieve liquidity at acceptable costs and to provide the necessary liquidity with the objective of protecting the Parent Bank's reputation.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

VI. Explanations Related to Liquidity Risk Management, Liquidity Coverage Ratio and Net Stable Funding Ratio (Continued)

1. Consolidated Liquidity Risk Management (Continued):

In the liquidity risk management of the Parent Bank, the limitations within the scope of the relevant regulations of the BRSA and the internal risk limits determined within the framework of the Parent Bank's "Risk Management Strategies, Policies and Implementation Principles" and general market conditions are determinants. Therefore, units active in liquidity risk management, especially the Treasury Unit, act within these limitations.

First limitation on legal requirements set by the BRSA is; as per the regulation on "Calculation of Liquidity Coverage Ratio", minimum limits of 100% and 80% are assigned on consolidated and unconsolidated basis respectively for total and foreign currency limits. On the other hand investment and development banks are exempt from those limitations until BRSA has determined otherwise.

The Bank's internal reporting within the scope of liquidity risk management consists of daily, weekly and monthly reports. Daily balance sheets and duration calculations are followed in daily basis report. On weekly reports, liquidity limits are monitored. Weekly realized liquidity limits determined by Board of Directors is aggregated in monthly risk limits monitoring report. Those reports investigate legal risks and adaption of early warning limits. Also, to monitor liquidity risk in "TKB Riskiness Analysis According to Selected Indicators and Risk Groups" report prepared monthly includes;

- Proforma Cash Flows Statement,
- Proforma Currency Balance Sheet,
- Duration of Balance Sheet Items, -in detail- Marketable Securities (by class of financial instruments),
- Summary of liquidity forms sent to BRSA

With proforma cash flows statement, amount of future liquid assets are shown in different scenarios for one-year period.

Related report is presented to the Board of Directors; the Audit Committee and senior management on a monthly basis. By taking into consideration these reports, the Asset Liability Committee and Audit Committee evaluate the liquidity position of the Parent Bank, and results of liquidity measurement system are included in the decision-making process.

Regarding the liquidity risk, as well as legal limits, internal limits have been determined in accordance with its own internal procedures, mission and risk appetite, as included in the Bank's Risk Appetite Structure, Risk Limits and Implementation Principles. These limits have been determined by the Board of Directors in excess of legal limits, including early warning limits, and are revised annually.

2. Consolidated liquidity coverage ratio:

The Group's liquidity coverage ratios are prepared monthly in accordance with the "Regulation on Calculation of the Liquidity Coverage Ratio of Banks" published in the Official Gazette dated 21 March 2014 and numbered 28948 and reported to the BRSA. Including the reporting period for the last 3 months levels of consolidated foreign currency and total liquidity coverage ratios are shown below by specified monthly:

3. Explanations related to consolidated liquidity coverage ratio:

Significant factors that impact the result of consolidated liquidity coverage ratio and change of the items in time that are taken into account in calculation of this ratio

The significant factors that impact liquidity coverage ratio are net cash outflows and high-quality assets stock. Items taken into consideration in the calculation of the ratio may be changed in time because of economic structure and decisions of the Bank's fund management.

The explanation about elements of the high-quality liquid assets:

High quality liquid assets mostly consist of domestic government bonds and eurobonds.

Content of funds and their composition:

The main funding source of the Parent Bank is loans attained from domestic and international financial institutions. The share of these resources in all funds is approximately 83,7% (31 December 2024: 82,4%), 4,4% (31 December 2024: 6,4%) of the Bank's total funding consists of funds obtained from international financial institutions, the Ministry of Treasury and Finance of the Republic of Türkiye, borrowers and banks, 6,1% (31 December 2024: 5,8%) from subordinated debt instruments, 2,8% (31 December 2024: 2,6%) from funds obtained from money markets and 3,1% (31 December 2024: 2,8%) from issued securities.

Cash outflows generating from derivative transactions and information about which transactions are subject to collateral margin:

Derivative transactions of the Parent Bank are predominantly currency swap purchase-sale transactions. Income and expense figures related to derivative transactions made within the year are accounted in profit/loss from derivative financial transactions. There are no transactions that are likely to complete collateral.

Counterparty and product-based funding sources and concentration limits on collateral:

The fund sources of the Parent Bank, whose field of activity is development and investment banking, are generally international development banks and financial institutions; there is no concentration limit on the other party and product basis.

The operational and legal factors that hinder consolidated liquidity transfer which is needed by the bank itself, its foreign branch and its consolidated subsidiary, and respective liquidity risk.

None.

4. Net stable funding ratio:

With the "Regulation on Calculation of Net Stable Funding Ratio of Banks" published in the Official Gazette No. 32202 dated 26 May 2023 by the BRSA, the procedures and principles for banks to provide stable funding in order to prevent the deterioration of their liquidity levels due to the funding risk that they may be exposed to in the long term have been determined. According to the related regulation, the net stable funding ratio is calculated on consolidated and unconsolidated basis by dividing the available stable funding amount by the required stable funding amount. Available stable funding refers to the portion of banks' liabilities and shareholders' equity that is expected to be permanent, while required stable funding refers to the portion of banks' on-balance sheet assets and off-balance sheet liabilities that are expected to be re-funded. These amounts are included in the ratio calculation after applying the calculation rates determined in the regulation.

4. Net stable funding ratio (Continued):

The quarterly simple arithmetic average of the quarterly net stable funding ratio calculated on a monthly and quarterly basis and reported to the BRSA cannot be less than 100%. However, development and investment banks are exempted from meeting these minimum ratios until otherwise determined by the BRSA. As of 31 December 2025, the average of the Bank's net stable funding ratio for the last three months is 149,61% (31 December 2024: 142.38%).

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

VII. Explanation Related to Consolidated Leverage Ratio

In the current period, the rate of increase in Tier 1 capital was higher than the rate of increase in total risk amount. As of 31 December 2025, the Group's leverage ratio calculated from the average of three months is 15,42% (31 December 2024: 14,73%). The reason why the leverage ratio of the current period is higher than the leverage ratio of the previous period is that Tier 1 capital has increased at a higher rate than the amount of the total risk amount.

Summary comparison table of total asset amount and total risk amount in consolidated financial statements prepared in accordance with TAS:

		Current Period ^{(1),(2)}	Prior Period ^{(1),(3)}
		(31.12.2025)	(31.12.2024)
1	The total amount of assets included in the consolidated financial statements issued in accordance with TAS	201.620.518	150.332.097
2	The difference between total assets prepared in accordance with Turkish Accounting Standards and total assets in consolidated financial statements prepared in accordance with the communiqué 'Preparation of Consolidated Financial Statements'	(870.712)	(634.058)
3	The difference between the amounts of derivative financial instruments and credit derivatives in consolidated financial statements prepared in accordance with the communiqué 'Preparation of Consolidated Financial Statements' and risk amounts of such instruments	525.765	689.053
4	The difference between the amounts of securities or commodity financing transactions in consolidated financial statements prepared in accordance with the communiqué 'Preparation of Consolidated Financial Statements' and risk amounts	(2.569.088)	(2.722.103)
5	The difference between the amounts of off-balance items in consolidated financial statements prepared in accordance with the communiqué 'Preparation of Consolidated Financial Statements' and risk amounts of such items	(44.108.928)	(21.229.692)
6	Other differences between the amounts in consolidated financial statements prepared in accordance with the communiqué 'Preparation of Consolidated Financial Statements' and risk amounts of such items	177.351.609	144.162.555
7	Total risk amount	219.417.214	163.359.197

⁽¹⁾ The amounts in the table show the averages of the last nine months of the relevant period.

⁽²⁾ The current period amount of the consolidated financial statements prepared in accordance with the 6th paragraph of the 5th article of the Communiqué on the Preparation of the Consolidated Financial Statements of Banks has been prepared by using the Independent financial statements of non-financial corporations dated 30 June 2025.

⁽³⁾ The previous period amount of the consolidated financial statements prepared in accordance with the 6th paragraph of the 5th article of the Communiqué on the Preparation of the Consolidated Financial Statements of the Banks has been prepared by using the audited financial statements of the non-financial corporations dated 30 June 2024.

	Current Period	Prior Period
	(31.12.2025)	(31.12.2024)

VIII. Explanations Related to the Presentation of Consolidated Financial Assets and Liabilities at Fair Values

When fair value of financial assets and liabilities are determined, discounted values are taken into consideration according to remaining maturities. Transactions traded on the stock exchange are valued by using the daily weighted average prices of the last working day on the balance sheet date based on the stock market value.

	Book Value (*)		Fair Value	
	Current Period (31.12.2025)	Prior Period (31.12.2024)	Current Period (31.12.2025)	Prior Period (31.12.2024)
Financial Assets	204.711.219	154.069.687	205.145.936	154.660.658
Money markets placements	9.706.549	9.921.861	9.706.549	9.921.861
Banks	24.104.563	12.718.116	24.078.532	12.718.116
Financial assets measured at fair value through profit or loss	989.240	696.997	989.240	696.997
Financial assets measured at fair value through other comprehensive income	33.715.442	25.517.503	33.715.442	25.517.503
Financial assets measured at amortised cost	12.446.568	10.402.375	12.367.506	10.246.272
Loans	123.748.857	94.812.835	124.288.667	95.559.909
Financial Liabilities	159.528.037	123.158.943	157.444.045	122.100.997
Interbank deposits	-	-	-	-
Other deposits	-	-	-	-
Funds provided from other financial institutions	143.260.696	111.674.359	143.867.368	112.243.474
Subordinated debt instruments	10.156.098	7.577.111	6.823.682	5.811.249
Securities issued	6.039.311	3.735.924	6.681.063	3.874.725
Sundry creditors	71.932	171.549	71.932	171.549

(*) The book values of financial assets and liabilities in the table are calculated by adding accrual amounts at the end of the period.

Methods and estimations used for the fair value determination of financial instruments which are not presented with their market values in the financial statements:

- i- For the fair value determination of loans, interest rates as of balance sheet date are considered.
- ii- For the fair value determination of banks, interest rates as of balance sheet date are considered.
- iii- In order to calculate the fair value of other financial assets measured at amortized cost, the stock market value as of the balance sheet date has been used.
- iv- For the fair value determination of the funds provided from other financial institutions, subordinated debt instruments and securities issued, alternative resource interest rates are considered.

VIII. Explanations Related to the Presentation of Consolidated Financial Assets and Liabilities at Fair Values (Continued)

Information on fair value measurements recognized in the financial statements:

TFRS 7 “Financial Instruments: Disclosures” Standard requires the items, which are recognized in the balance sheet at their fair values to be shown in the notes by being classified. According to this standard, the related financial instruments are classified into three levels in such a way that they will express the significance of the data used in fair value measurements. At the first level, there are financial instruments, whose fair values are determined according to quoted prices in active markets for identical assets or liabilities, at the second level, there are financial instruments, whose fair values are determined by directly or indirectly observable market data, and at the third level, there are financial instruments, whose fair values are determined by the data, which are not based on observable market data. Investor valuation and price reports are used for determination of fair values of level 3 assets. The financial assets, which are recognized in the balance sheet at their values, are shown below as classified according to the aforementioned principles.

Current Period (31.12.2025)	Level 1	Level 2	Level 3
Financial Assets at Fair Value Through Profit or Loss	-	-	989.240
Debt securities	-	-	-
Share certificates	-	-	989.240
Other	-	-	-
Financial Assets at Fair Value Through Other Comprehensive Income	13.613.998	20.092.631	-
Debt securities	13.613.998	20.092.631	-
Share certificates ⁽¹⁾	-	-	-
Other	-	-	-
Derivative Financial Assets	-	31.258	-
Investment in Associates and Subsidiaries⁽¹⁾	-	-	-
Derivative Financial Liabilities	-	18.817	-

¹⁾ Non-public subsidiaries, affiliates and unlisted shares are monitored at cost of acquisition. Cost may be an appropriate estimate of fair value. This situation is measured at cost because there is not enough recent information regarding the measurement of fair value or because fair value can be measured by more than one method and among these methods, cost best reflects the fair value estimate

Prior Period (31.12.2024)	Level 1	Level 2	Level 3
Financial Assets at Fair Value Through Profit or Loss	-	-	696.997
Debt securities	-	-	-
Share certificates	-	-	696.997
Other	-	-	-
Financial Assets at Fair Value Through Other Comprehensive Income	24.749.229	759.461	-
Debt securities	24.749.229	759.461	-
Share certificates ⁽¹⁾	-	-	-
Other	-	-	-
Derivative Financial Assets	-	144.142	-
Investment in Associates and Subsidiaries⁽¹⁾	-	-	-
Derivative Financial Liabilities	-	20.889	-

¹⁾ Non-public subsidiaries, affiliates and unlisted shares are monitored at cost of acquisition. Cost may be an appropriate estimate of fair value. This situation is measured at cost because there is not enough recent information regarding the measurement of fair value or because fair value can be measured by more than one method and among these methods, cost best reflects the fair value estimate

VIII. Explanations Related to the Presentation of Consolidated Financial Assets and Liabilities at Fair Values (Continued)

The table below shows the movement table of Level 3 financial assets.

Level 3 Movement Table	Current Period (31.12.2025)	Prior Period (31.12.2024)
Balance at the Beginning of the Period	696.997	595.641
Purchases During the Period	97.187	19.525
Disposals Through Sale/Redemptions	(11.278)	(4.024)
Valuation Effect	206.334	90.040
Transfers	-	(4.186)
Balance at the End of the Period	989.240	696.997

IX. Explanations Related to the Transactions Made on Behalf of Others and Items Held in Trust

The Bank provides security buying, selling and custody services on behalf and account of others. The Bank also acts as an intermediary in the execution of tourism and infrastructure investments on behalf of the Republic of Türkiye Ministry of Culture and Tourism, and no new resources have been transferred in this context recently.

The Bank does not carry out any transactions based on faith.

X. Explanations Related to Consolidated Risk Management

1. General information on risk management and risk-weighted amounts:

The Parent Bank’s risk management approach:

It should be emphasized firstly that the Bank is actively using committees and risk budgeting in decision-making mechanisms and risk management processes while assessing risk management performance in addition to the functional and financial performance, which has operational mechanisms based on a wide range of activities. Within the framework of the Bank's vision, mission, strategic objectives and targets set by the Board of Directors and risk management policies and strategies; the Asset and Liability Committee and the Credit Evaluation Committee constitute two main committees that play a critical role in the execution of the Bank’s activities; which the Asset and Liability Committee ensuring that the assets and liabilities are managed effectively and efficiently by taking into consideration the current and possible economic developments and the factors such as interest, maturity and currency, and establishing coordination and communication between the Senior Management and the Bank's units, and the Credit Evaluation Committee with the function of determining the principles of lending, evaluating the credit-participation risk and the situation of the investment, evaluating the reports prepared on the loan appraisal and in summary taking care of all the lending activities. Within the framework of the short-term strategies determined by the Asset and Liability Committee in line with the vision and strategic objectives of the Bank’s Strategic Plan, each of the units in the Bank comply with these targets and the risk budgeting application based on the consolidation of these budgets are applied to contribute to the basic activities of the Bank.

Risk monitoring processes constitute the main determinant of risk management policies in decision making processes in the Bank. The organizational structure of the risk monitoring processes is composed of, the “Internal Control and Compliance” and “Risk Management” Directorates which the duties and authorities established within the Bank with the decision of the Board of Directors pursuant to the Banking Law and the BRSA legislation, the Audit Committee and the Internal Inspection Department. The units within the internal systems of the Bank and the Audit Committee undertake their activities in accordance with the “Regulation on Internal Systems of Banks and Internal Capital Adequacy Assessment Process” dated 11/07/2014 and numbered 29057 of the BRSA.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

1. General information on risk management and risk weighted amounts:

The Parent Bank's risk management approach (Continued):

The general principle of the risk policies followed by the Bank where committees and the implementation of risk budgeting are actively used in decision-making mechanisms and risk management processes; which was approved by Board of Directors dated 11.01.2016, 2016-01-15/015 stated in the Bank's "Risk Management Strategies, Policies and Implementation Principles", "To specialize in the activities in accordance with the mission, vision and structure determined by the Establishment Law, to take risks that can be identified, controlled and / or managed, and to make efforts to avoid any risks other than the risks inevitable and arising as part of the nature of the activities". While the Bank is specializing in its activities and shaping the asset composition in line with this general principle in accordance with its vision and structure, in the risk management policy it is subject to the principle of "taking risks that can be controlled and / or managed, not taking any risks other than the risks that are unavoidable and to apply this principle as much as possible. In this context, it is the basic principle to ensure that the risks to be taken are defined and manageable.

In addition, to the extent that risk measurement and reporting techniques allow, measurement of the present and future potential impacts of the risks taken is made and written limits for the quantifiable risks arising from the operations of the Bank are determined according to the BRSA regulations. Therefore, the risk appetite of the Bank is determined and monitored by the risk limits prepared in accordance with the provisions of Article 39 titled "Risk Appetite Structure" of Internal Systems and ICAAP Regulations of Banks No. 29057 issued by the BRSA and published in the Official Gazette on 11 July 2014. "Risk Limits and Implementation Principles", which are revised by the Risk Management Department annually in accordance with the Bank's risk policies and accepted by the Board of Directors, are the main policy that determines the Bank's risk appetite structure.

According to the "Risk Limits and Implementation Guidelines" which is the most important indicator of the risk appetite of the Bank, limits, early warning limits and actions to be taken in case of exceeding limit are determined by basic risk groups. In determining limits, the legal limits shape the general framework. However, in addition to the principle of prudence in risk management, specific limits specific to the Bank are also set for each risk type. The early warning limits are intended to prevent limit overs, and the limits are set one level below (or above). Each risk group covered by the Bank's risk limits is monitored by reports made to the Senior Management and the Audit Committee on a daily, weekly, monthly basis by the Risk Management Department and is first informed to the relevant unit in the framework of the actions to be taken in determining the elimination of exceeded limits.

It is clear that both the decision-making mechanisms and the risk management processes are the general principle of risk policies and the Bank has a "risk avoider" risk appetite within the framework of risk limits and implementation principles.

The limits stated in the text of "Risk Appetite Structure, Risk Limits and Implementation Principles" approved by the Board of Directors within the framework of the 37th article of "Regulation on Internal Systems of Banks" issued by the BRSA for quantifiable risks arising from the activities of the Bank are determined. The Risk Management Department monitors compliance with these limits and regularly reports to the Board of Directors, the Audit Committee and the Senior Management.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

1. General information on risk management and risk weighted amounts:

The Parent Bank's risk management approach (Continued):

Stress test scenario analyzes carried out by the Bank within the scope of risk management activities include various techniques to measure the potential resilience of the Bank portfolio against unexpected risks. Capital Planning Buffer prepared in accordance with the provisions of the "Stress Test Program" specified in article 43 of "Regulation on Internal Systems of Banks and Internal Capital Adequacy Assessment Process" and Guidelines for Stress Tests to be Used by Banks in Capital and Liquidity Planning and specified in Article 59 of the Regulation. The results of the implementation of the scenarios determined by the BRSA used in the calculation are sent to the BRSA within the scope of the ISEDES (Internal Capital Adequacy Assessment Process) Report prepared by Risk Management Department annually. In the ISEDES Report, the Bank's capital adequacy level is evaluated by applying the BRSA and Bank scenarios on the Bank's 3-year Strategic Plan predictions.

The stress test scenario analyzes, which are updated quarterly for the Bank, are also structured in a structure parallel to ISEDES practices. Stress testing is carried out by applying two negative scenarios of the relevant year, determined by the BRSA, to the financial statements and capital adequacy ratio components of the period to be tested.

In the stress test study, shocks are given on the basis of two basic parameters (interest and exchange rate), and by each parameter and each scenario the effects of these shocks on;

- i- Balance sheet and statement of profit or loss
- ii- Legal equity
- iii- Risk Weighted Assets (RWA)
- iv- Capital Adequacy Ratio (CAR)

are evaluated.

The first parameter used in the scenario analysis is the exchange rate and the other is the interest rates. Exchange rate and interest shocks are designed as base, negative and extremely negative scenarios sent by BRSA.

On the Bank's securities portfolio, portfolio sensitivity is firstly calculated against changes in interest rates, and two separate scenarios are set forth to compensate for the potential loss arising from adverse interest rate changes.

The Bank's "Proforma Cash Flows Statement" analysis, which is prepared based on the possible cash inflows and outflows in the next one-year period, including seven different scenarios, ranging from 45 percent to 95 percent of "loan collection rates" and implicitly including currency and interest forecasts, it is the most detailed scenario analysis that the Bank has prepared. In this analysis, the effects of different collection ratios on the liquidity risk of the Bank are evaluated.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

2. Credit risk explanations:

General qualitative information on credit risk:

The Bank calculates its legal credit risk as per the framework of the “Regulation on the Measurement and Evaluation of Banks’ Capital Adequacy” and Basel II criteria. The management of credit risk is essential in such a way as to ensure that the standard ratio of legal capital adequacy is above the minimum limit of existing regulations.

Within the scope of “Basel II application” under the measure of credit risk, the standard method prescribed by the BRSA is used and this measurement method based on weighting to the classes and guarantees of the loans is embodied in the KR520 form which is reported monthly to the BRSA. There are basically 3 main headings of the form:

- Risk Classes,
- Credit Risk Reduction Techniques and Credit Risk Substitution Effects,
- Distribution by Risk Weights.

In order to determine the credit risk, the Bank’s Risk Weighted Assets are classified by “Separation On The Basis of Risk Classes”. After the asset is classified according to the risk classes, collaterals received on loans are assessed under Basel II “Credit Risk Mitigation Techniques and Credit Risk Substitution Effects”. The credit risk is measured monthly within the standard method framework, by using the algorithm in the “Basel II Credit Rating Classification”.

Respecting the credit risk management measurement, monitoring, stress testing and scenario analysis studies in line with the volume, quality and complexity of loans and reporting results are provided to the Audit Committee and the Board of Directors.

Beside the standard method for determining the level of credit risk that the Bank may encounter, by moving from the Bank’s loan portfolio structure for risk measurement and monitoring activities;

- Credit Risks by Sectors
- Credit Risks by Region
- Non-performing Loans Analysis
- Concentration Analysis of Credits
- Risks Weights of Loan Collaterals
- Sectoral Risks According to Risk Weights of Loans
- Distribution of Loans by Maturity and Source
- Distribution of Performing Credits are analyzed and reported.

In the Bank’s credit risk management policy, diversification of credit portfolio is essential. Although the Bank is not subject to the credit restrictions imposed on banks accepting deposits pursuant to Article 77 of the Banking Law No. 5411, the Bank has determined its credit limits with the “Credit Policy” published with the approval of the Board of Directors. Credit risk limits are determined in the text of “Risk Appetite Structure, Risk Limits and Implementation Principles” approved by the Board of Directors, and the limits are monitored daily, weekly and monthly by the Risk Management Unit and reported to the Top Management.

SECTION FOUR (Continued)

CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

2. Credit risk explanations (Continued):

General qualitative information on credit risk (Continued):

All units, including the departments within the Internal Systems, fulfill their duties, authorities, and responsibilities within the scope of credit risk management in accordance with the framework of the Banking Law, Internal Systems Regulation, and Bank's Duties, Authorities, Responsibilities, and Organization Principles.

The senior management is responsible for the implementation of the credit risk strategy approved by the board of directors and the development of policies and procedures for the recognition, measurement, monitoring, and control of credit risk, and these policies and procedures include credit risks related to all banking activities in the Bank's portfolio.

The explanations prepared by the "Communiqué on Disclosures About Risk Management to be Announced to Public by Banks" published in the Official Gazette No. 29511 on 23 October 2015, and entered into force as of 31 March 2016, are given below.

The Bank reveals risks of the effects of income/expense, capital loss, liquidity adequacy, etc. that may arise regarding macroeconomic indicators and bank-specific situations with periodic reports and stress test studies. Daily, weekly, monthly and annual reports are produced with the risk measurement models and methods used by the Bank regarding the risk situation of the Bank, and they are regularly reported to the Board of Directors, Audit Committee, and Senior Management. The possible effects on the Bank's equity and capital adequacy ratios and liquidity adequacy level are closely monitored.

It is aimed to disseminate the risk appetite framework and culture created by the Bank through the training given to the personnel, risk measurements and reporting, and risk reporting to the Board of Directors, Senior Management, and Committees.

As a part of the risk appetite structure, it is aimed to determine the risk appetite level of the Bank through regulations such as the determination of risk limits, limit exceedance exceptions, and early warning levels. Limits are updated periodically, taking into account the developments in the Bank's strategy and risk appetite. Early warning levels indicating that the determined limits are approached have also been determined, and in case the limit levels are approached or exceeded, the relevant units take the necessary actions and arrangements. Risk limits are determined together with the relevant senior managers, including the Manager of the Risk Management Unit and the General Manager of the Bank, and submitted to the Board of Directors for approval following the approval of the Audit Committee. While determining the limits, the macroeconomic environment and market trends, as well as the targets and policies of the Bank are taken into account, and risk concentration limits are determined based on sector, geographical region, country and product.

Since the Bank uses a standard approach in capital adequacy calculations, explanations within the scope of the internal rating-based approach are not included.

**CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT
(Continued)**

X. Explanations Related to Consolidated Risk Management (Continued)

2. Credit risk explanations (Continued):

Additional disclosures about the credit quality of assets(Continued):

The Bank evaluates its financial assets in 3 Stages within the scope of TFRS 9. In this context, for defaulted loans (3.Stage) and loans that have not yet defaulted, but which have significantly increased credit risk from the date of the loan's issuance (2.Stage), the Bank calculates the expected lifetime credit loss. The Bank's other financial assets covered by TFRS 9 (1.Stage); the Bank reflects the probability of default within 12 months after the reporting date as the expected loss provision.

In case of payment failure of borrowers to the Bank due to temporary liquidity shortage loans and other receivables, including overdue interest, are restructured within the scope of the Provision Regulation by opening additional loans when necessary in order to provide liquidity strength to the borrower and to ensure the collection of the Bank's receivables.

Temporary liquidity shortage is considered as a manageable cash deficit caused by a loan borrower who has the solvency to pay his obligations on time and in full becoming irregular due to fluctuations in fund inflows and outflows, sales revenues or operating income arising from normal activities due to an unexpected and temporary reason.

Restructured loans will continue to be monitored in the groups in which they are classified and monitored until that date. During this period, provisions for these receivables continue to be allocated within the scope of TFRS 9.

Qualitative requirements to be disclosed to the public regarding credit risk mitigation techniques:

In the calculation of the amounts subject to credit risk, the Parent Bank evaluates the loans in terms of risk weight, taking into consideration the risk classes, grading notes and risk reduction elements within the context of “Communiqué on Credit Risk Mitigation Techniques”.

The Parent Bank does not make on-balance sheet and off-balance sheet netting within the scope of credit risk mitigation. Applications related to valuation and management of collateral are carried out in line with the “Communiqué on Credit Risk Mitigation Techniques”. Main guarantees taken by the Bank in the context of credit risk mitigation techniques are financial guarantees (cash) and guarantees (Turkish Treasury and banks). Monetary guarantees are evaluated with the most recent values as of the reporting date in the credit risk reduction process. In the event that a bank loan customer receives guarantees obtained from other institutions, the credit risk worthiness of the guaranteeing institution in the credit risk reduction process is taken into consideration.

Overview of credit risk mitigation techniques:

	Current Period (31.12.2025)	Exposures unsecured: carrying amount as per TAS	Exposures secured by collateral	Collateralized amount of exposures secured by collateral	Exposures secured by financial guarantees	Collateralized amount of exposures secured by financial guarantees	Exposures secured by credit derivatives	Collateralized amount of exposures secured by credit derivatives

Qualitative information on ratings used by banks while calculating credit risk with standard approach :

The risk weights of the risk categories as per the Article 6 of the “Regulation on Measurement and Assessment of Capital Adequacy Ratios of Bank” are determined pursuant to the regulations. Any external risk ratings which are determined by any international rating agency are not used.

SECTION FOUR (Continued)**CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)****X. Explanations Related to Consolidated Risk Management (Continued)****3. Explanations on counterparty credit risk:****Qualitative explanation of the evaluation of counterparty credit risk according to measurement methods:**

A counterparty credit risk is the risk that a counterparty who is involved in a transaction that is liable to both parties defaults before the final payment in the cash flow of that transaction.

The Bank takes necessary measures to limit counterparty credit risks arising from bilateral transactions, such as off-balance sheet over the counter derivative transactions, by taking into account risk capacities.

Transactions made by the Treasury Department including counter-party risks such as over the counter forward, swaps and options are reported daily to the Senior Management and Risk Management Department. All transactions made with counterparty are considered within the limits of the counterparty. Exceeded limits are reported daily to the responsible managers and are recorded with all measures taken to overcome these limitations.

**CONSOLIDATED INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT
(Continued)**

X. Explanations Related to Consolidated Risk Management (Continued)

4. Explanations on market risk:

Qualitative information to be publicly disclosed on market risk:

The Parent Bank is exposed to market risk depending on the fluctuations that may occur in the financial market as a result of its activities, in exchange rates, interest rates and stock prices.

The Parent Bank calculates and legally reports its market risk by using the standard method within the framework of the provisions of the “Regulation Regarding the Measurement and Evaluation of Banks’ Capital Adequacy” published in the Official Gazette No. 29511 dated 23 October 2015.

In addition to the monthly standardized methodology, the market risk is calculated on a daily basis using the Value At Risk (“VaR”) approach. The VaR calculated by using the internal model to predict the potential loss in financial market conditions, the stress tests and scenario analysis results, including the price changes occurring in the crises that occurred in previous years or the probable effects of different interest and exchange rate shocks on existing portfolios are reported to Audit Committee and top management.

In accordance with the “Regulation on the Internal Systems of Banks and the Internal Capital Adequacy Assessment Process” published on the Official Gazette dated 11 July 2014 and numbered 29057, the limits of these risks are determined by taking into account the main risks borne by the Bank and such risk limits are determined within the framework of changing market conditions and Bank strategies “Risk Appetite Structure, Risk Limits and Implementation Principles” which are frequently revised and approved by the Board of Directors.

The reports prepared within the framework of compliance with the risk limits are regularly presented to the Board of Directors, the Audit Committee and senior management.

5. Linkages between the financial statements and risk amounts:

Explanations on differences between the amounts prepared as per TAS and the risk amounts:

“Credit Risks” are calculated over the securities classified as “Financial assets at fair value through profit or loss” and “Financial assets at fair value through other comprehensive income”.

Repurchase and reverse repo transactions of the Bank are subject to “Counterparty Credit Risks” and the Capital Obligation against Counterparty Credit Risk is calculated and reported under the “Credit Risk”. In addition, “Market Risk” is calculated over the securities used in the “Reverse Repo” transactions.

The amount in the “Off-balance amounts” row of the “Main sources of differences between risk amounts and amounts valued in accordance with TAS in the financial statements” table is reported as the “Amount Subject to Credit Risk” by multiplying it with the “Credit conversion ratios”.

5	Valuation differences	-	-	-	-	-
6	Differences arising from netting of differences (other than line 2)	-	-	-	-	-
7	Differences arising from consideration of provisions	-	-	-	-	-
8	Differences arising from the applications of the BRSA	-	-	-	-	-
	Risk amounts	196.836.765	137.324.109	-	18.723.932	21.612.726

There is no significant difference between the amounts reported in the financial statements by TAS and the risk amounts used within the scope of capital adequacy.

SECTION FOUR (Continued)

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

6. Explanations on operational risk:

According to the Parent Bank's Operational Risk Management Policy, operational risk management practices are developed taking into account the fact that errors and irregularities are overlooked as a result of failures in internal controls, the Bank's management and staff do not act in accordance with time and conditions, errors and failures in information technology systems, losses that may arise from disasters such as earthquakes, fires, floods, and losses caused by other factors that may occur on the Bank and sector basis.

The amount based on the operational risk at the Bank is determined by Article 14 of the "Regulation on the Measurement and Evaluation of the Capital Adequacy of Banks". It is calculated using the basic indicator method within the scope of the article. The value found by multiplying the average of fifteen percent of the bank's year-end gross income amounts realized as of the last three years by twelve and a half is taken into account as the amount based on operational risk.

Annual gross income is calculated by adding net interest income, net fee and commission income, dividend income from shares other than subsidiary and affiliate shares, commercial profit/loss (net) and other operating income, profit/loss from the sale of assets tracked in securities measured at amortised cost, extraordinary income and insurance indemnity amounts to net interest income as shown in the statement of profit or loss of financial reports.

Current Period (31.12.2025)	31.12.2022	31.12.2023	31.12.2024	Total / Positive GI year number	Ratio (%)	Total
Gross income	3.109.322	7.010.218	10.629.334	6.916.291	15	1.037.444
Amount subject to operational risk (Total*12,5)						12.968.046

Prior Period (31.12.2024)	31.12.2021	31.12.2022	31.12.2023	Total / Positive GI year number	Ratio (%)	Total
Gross income	1.496.489	3.109.322	7.010.218	3.872.010	15	580.801
Amount subject to operational risk (Total*12,5)						7.260.018

The Operational Risk Management Policy, which has been renewed to determine the policy, principles, approach and basic elements on Operational Risk management in order to set out the risks that the Bank will be exposed to in line with its general strategies and long-term goals and the strategies it will follow for these risks, has been approved by the Board of Directors as of 30.12.2020. With this policy, it is aimed to contribute to the establishment of an settled and consistent "Operational Risk Culture" throughout the Bank through the identification, detection, measurement, evaluation and reporting of Operational Risks.

It is envisaged that audit findings, internal loss data, risk control and self-assessment report, operational risk analysis report, external data, business process map and key risk indicators will be used in the identification and evaluation of operational risk. In order to analyze the operational risk, risk control and self-assessment studies, operational risk analysis report, scenario analysis and stress tests are planned to be carried out. As part of reducing operational risks and improving the effectiveness of the operational risk management process, controlling the risks incurred by applying established policies and procedures, reducing them using risk reduction techniques such as insurance, transferring them to another area, using methods such as the use of basic elements that will increase the effectiveness of operational risk management can be listed as the main elements that will increase the effectiveness of operational risk management.

SECTION FOUR (Continued)

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

X. Explanations Related to Consolidated Risk Management (Continued)

6. Explanations on operational risk (Continued):

The Bank's Support Services procedures, emergency and contingency plans, which enable the transfer of operational risks by obtaining some necessary support services from specialized organizations, as well as special policies, procedures and controls on money laundering and terrorist financing, which may cause operational risks, management of IT risks, are also envisaged to be established.

In the Bank, all operational risks are within the framework of defining, evaluating, monitoring and controlling / reducing risks. All operational risks in the Bank, within the framework of the identification, evaluation, monitoring and control/reduction of risks, is managed under the supervision of the Board of Directors and the Audit Committee. The results of the activities of the Internal Audit Unit and Internal Control and Compliance Unit for monitoring operational risks are monitored and evaluated by the Audit Committee.

Legal measurements for Operational Risk are made using the Basic Indicator Method within the scope of the Regulation on Measurement and Assessment of Capital Adequacy of Banks. Studies of other measurement methods for Measurement of Operational Risks within the scope of Basel and BRSA regulations are carried out by the Risk Management Unit.

7. Interest rate risk on banking accounts:

Parent Bank calculates the interest rate risk on banking book according to “Regulation on Measurement and Evaluation of Interest Rate Risk on Banking Book as per Standard Approach Method” and reports to the BRSA monthly.

The interest rate risk report arising from the banking book includes the following items as assets: due from the Central Bank, money market receivables, due from banks, financial assets at fair value through other comprehensive income (Non-Interest-Bearing), loan receivables, other financial assets measured at amortised cost and other receivables; liabilities consist of payables to the Central Bank, payables to money markets, payables to banks, funds obtained from repurchase agreements, securities issued, loans used, subordinated debts and other payables.

Economic value changes due to the interest rate instabilities calculated according to “Regulation on Measurement and Evaluation of Interest Rate Risk on Banking Book as per Standard Approach Method” are presented below for each currency.

SECTION FIVE (Continued)

EXPLANATIONS AND NOTES RELATED TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

I. Explanations and Notes Related to Consolidated Assets (Continued)

2. Explanations on financial assets measured at amortised cost (Net) (Continued):

2.1. Information on loans (Continued):

2.1.k) Main principles of liquidating non-performing loans and other receivables:

If there are collateral elements said in the fourth section of the Regulation on the Procedures and Principles Regarding the Classification of Loans and Provisions to be Reserved for them, these elements are converted into money as soon as possible as a result of both administrative and legal initiatives and the liquidation of the receivable is provided.

In the case collaterals are not present; the Bank is engaged in substantive intelligence in various periods to determine whether any property holdings are subsequently acquired in order to apply for legal procedures, even if a certificate of insolvency is obtained for the debtor.

Before and after liquidation process; the Bank reviews financial information of the debtor companies. Then, in the case it is agreed that the companies show indications of operating on an ongoing basis and probably are going to have contributions to the economy; the Bank tries to make collections through rescheduling the payment terms.

2.1.l) Explanations on write-off policy:

Within the scope of the “Regulation Amending the Regulation on Procedures and Principles for Classification of Loans and Provisions to be Set Aside”, which entered into force after being published in the Official Gazette dated 6 July 2021 and numbered 31533, the portion of “Fifth Group-Loans in the Type of Loss” with life-time loss provision for which there is no reasonable expectation of recovery is deducted from records in accordance of TFRS 9 within the period deemed appropriate by the Bank beginning from the first reporting period following their classification in this group. The write-off transaction is an accounting practice and does not imply that the Bank has waived its claims. Following the write-off, administrative and legal collection processes continue to be pursued.

As of 31 December 2025, the Bank has written-off loans amounting to 7.962 TL (31 December 2024: None).

2.2. Information on finance lease receivables (Net):

The Group has no receivables arising from leasing transactions. (31 December 2024: None.).

2.3. Information on factoring receivables:

None.

Other (Effect of expenses not allowed by law, discounts, etc.)	(58.169)	(79.848)
Tax Provision	3.943.181	2.532.590

11. Information on net profit and loss of continued and discontinued operations:

Group has earned net profit of TL 9.006.859 from continuing operations between 1 January 2025-31 December 2025 (1 January 2024-31 December 2024: TL 6.175.535 profit).

12. Information on net profit/loss:

12.a) The nature and amount of income and expenses from ordinary banking operations, if their feature, amount and frequency are required for the complete understanding of the performance of the Bank in the current period:

None.

12.b) The effect of the change in accounting estimates to the net profit/loss; including the effects to the future period, if any:

There are no changes in accounting estimates.

13. If the other items in the statement of profit or loss exceed 10% of the statement of profit or loss total, sub-accounts amounting to at least 20% of these items are presented below:

The total amount of other fees and commissions received in the profit or loss statement for the accounting period ended on 31 December 2025 is TL 235.219 (31 December 2024: TL 198.825). Of this amount, TL 58.783 (31 December 2024: TL 65.018) consists of compensation for early terminated loans, TL 48.689 (31 December 2024: TL 45.522) consists of investment banking service income and TL 23.468 (31 December 2024: TL 22.060) consists of CBRT investment advance commissions.

The total amount of other fees and commissions given in the statement of profit or loss for the accounting period ended on 31 December 2025 is TL 54.667 (31 December 2024: TL 39.863). Of this amount, TL 9.905 (31 December 2024: TL 15.771) consists of stock market transaction commissions, and TL 6.096 (31 December 2024: TL 4.019) consists of appraisal expenses.

14. Profit / loss attributable to minority rights:

None.

SECTION FIVE (Continued)

**EXPLANATIONS AND NOTES RELATED TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Continued)**

V. Explanations and Notes Related to Statement of Changes in Shareholders' Equity

The paid nominal capital amount in the legal records is TL 10.000.000 (31 December 2024: TL 5.500.000), as of the balance sheet date, the legal reserve funds balance is TL 730.996 (31 December 2024: TL 422.617), the extraordinary reserve funds balance is TL 13.403.533 (31 December 2024: TL 7.536.109) other profit reserves are TL 54.226 (31 December 2024: TL 54.226).

The fair value difference of TL 161.361, which is the entire amount of valuation difference of securities, results from the change in value of financial assets measured at fair value through other comprehensive income.

VI. Explanations and Notes Related to Consolidated Statement of Cash Flows

1. Explanations related to “other” items and “effect of change in foreign currency rates on cash and cash equivalents” in statement of cash flows:

Group's net cash inflow from banking activities amounts to TL 7.425.550 (31 December 2024: TL 5.846.267). The portion of the net cash inflow resulting from banking activities amounting to TL (2.207.278) (31 December 2024: TL (1.060.222)) is from the change of asset and liability accounts; the portion amounting to 9.632.828. (31 December 2024: TL 6.906.489) arises from operating profit. The item “Net Increase (Decrease) in Other Debts” included in the change of asset and liability accounts arises from funds received, funds provided from repo transactions, miscellaneous debts, other foreign sources and changes in taxes, duties, fees and premiums to be paid as TL (1.073.658) (31 December 2024: TL 1.589.040). The “Other” item included in the operating profit consists of other operating expenses excluding fees and commissions paid and personnel expenses and was realized as TL (565.227) (31 December 2024: TL (433.036)).

There is cash inflow from financing activities due to the cash capital increase in 2025.

The effect of the change in foreign exchange rate on cash and cash equivalent assets includes the exchange rate difference between the exchange rate on the day the foreign currency cash and cash equivalent assets were traded and the exchange rate on the reporting date and amounted to TL 994.468 (31 December 2024: TL (365.060)).

VII. Explanations Related to Risk Group of the Parent Bank

Predicted limitations determined in the Banking Law are maintained through internal regulations in the Bank which has no transactions related to deposit acceptance. For the transactions with risk groups, normal customer relationships and market conditions are taken into account. The Group adopts policies that restrict the balance of transactions with risk groups in total assets and liabilities. Practices are carried out in accordance with this policy.

a) Current Period:
