## **REVIEW REPORT ON UNCONSOLIDATED INTERIM FINANCIAL INFORMATION**

To the Board of Directors of Türkiye Kalkınma ve Yatırım Bankası A.Ş.

### **Introduction**

We have reviewed the accompanying unconsolidated balance sheet of Türkiye Kalkınma ve Yatırım Bankası A.Ş (the "Bank") as at 31 March 2021 and the unconsolidated statement of profit or loss, unconsolidated statement of profit or loss and other comprehensive income, unconsolidated statement of changes in shareholders' equity, unconsolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the unconsolidated financial information for the three-month-period then ended. The Bank Management is responsible for the preparation and fair presentation of these interim financial information in accordance with the "Banking Regulation and Supervision Agency ("BRSA") Accounting and Reporting Legislation" which includes "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Board and Turkish Accounting Standard 34 "Interim Financial Reporting" principles for those matters not regulated by afore-mentioned legislations. Our responsibility is to express a conclusion on these interim financial statements based on our review.

#### Scope of review

We conducted our review in accordance with Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unconsolidated interim financial information do not presented fairly in all material respects, the financial position of Türkiye Kalkınma ve Yatırım Bankası A.Ş. at 31 March 2021, and its unconsolidated financial performance and its cash flows for the three-month period then ended in all aspects in accordance with the BRSA Accounting and Financial Reporting Legislation.

#### *Report on other regulatory requirements arising from legislation*

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information provided in the accompanying interim activity report in section seven, are not consistent with the reviewed unconsolidated interim financial statements and disclosures in all material respects.

#### *Additional paragraph for convenience translation to English*

The accounting principles summarized in Note 1 Section Three, differ from the accounting principles generally accepted in countries in which the accompanying unconsolidated interim financial information is to be distributed and International Financial Reporting Standards ("IFRS"). Accordingly, the accompanying unconsolidated interim financial information is not intended to present the financial position and results of operations in accordance with accounting principles generally accepted in such countries of users of the unconsolidated interim financial information and IFRS.

## **SECTION ONE**

### **GENERAL INFORMATION**

#### **I. Establishment Date of the Bank, Initial Articles of Association, History of the Bank Including the Changes of These Articles:**

The Bank was established on 27 November 1975 according to the Decree Based on Law numbered 13 as a related institution of the Ministry of Trade and Technology with the legal title of “Devlet Sanayi ve İşçi Yatırım Bankası A.Ş.”. Some adjustments were made on the status of the Bank with the Decree Based on Law numbered 165 dated 14 November 1983.

On 15 July 1988, its legal title was changed to Türkiye Kalkınma Bankası A.Ş. by being associated to the Prime Ministry in the context of the Decree Law numbered 329 and in parallel with the developments in its activities. The Bank had become a development and investment bank that provides financing support to companies in tourism sector as well as trade sector by taking over T.C. Turizm Bankası A.Ş. with all of its assets and liabilities with the decision of Supreme Planning Council dated 20 January 1989 and numbered 89/T-2. Also with the Decree Law numbered 401 dated 12 February 1990, some of the articles related to the Bank status were changed.

With the Law dated 14 October 1999 and numbered 4456, Decree Law numbered 13, 165, 329 and 401 were revoked and the establishment and operating principles of the Bank were rearranged.

Türkiye Kalkınma ve Yatırım Bankası A.Ş. Law dated 24 October 2018 and numbered 7147 was abolished and the Law dated 14 October 1999 and numbered 4456 was revoked. The Bank’s name was changed to Türkiye Kalkınma ve Yatırım Bankası A.Ş with the law numbered 7147.

#### **II. Capital Structure of the Bank, Shareholders that Retain Direct or Indirect Control and Management of the Bank Solely or Together, Changes about These Issues During the Year And Disclosures about the Group:**

The capital ceiling of the Bank which is subject to registered capital system is TL 2.500.000. The issued capital within the registered capital is TL 1.600.000 (The Bank’s capital consist of 160 Billion shares with par value of TL 0,01 each), and the shareholders and their shares in the issued capital are shown below:

<b>Shareholders</b>	<b>Share Amount (Thousand TL)</b>	<b>Share (%)</b>	<b>Share Capital (Thousand TL)</b>	<b>Unpaid Capital (Thousand TL)</b>
Treasury	1.585.304	99,08	1.585.304	-
Other Shareholders <sup>(*)</sup>	14.696	0,92	14.696	-
<b>Total</b>	<b>1.600.000</b>	<b>100,00</b>	<b>1.600.000</b>	<b>-</b>

(\*)Includes all shareholders and shares of theses shareholders are traded in Borsa İstanbul. Therefore, number of shareholders can’t be known.

Executives mentioned above do not own any shares of the Bank in the part which is not publicly traded.

**SECTION ONE (Continued)**

**GENERAL INFORMATION (Continued)**

**IV. Information About Persons And Institutions that Have Qualified Shares Attributable to the Bank:**

Republic of Turkey Ministry of Treasury and Finance owns 99,08% of the shares of the Bank.

**V. Summary of Functions and Lines of Activities of the Bank:**

As an investment and development bank of Türkiye Kalkınma ve Yatırım Bankası A.Ş.'s operating areas are supporting investments and projects for sustainable growth, ensuring the efficient use of capital and fund resources, financing domestic, international and international joint investments, and profit partnership or lease-based loan transactions by using modern development and investment banking tools in line with our country's development goals, to ensure that all development and investment banking functions can be performed in a competitive, dynamic and effective manner.

**VI. Information on Application Differences Between Consolidation Practices as per the Regulation on Preparation of Consolidated Financial Statements of Banks and the Turkish Accounting Standards, and Entities Subject to Full or Proportional Consolidation or Deducted From Equity or Not Subject to Any of These Three Methods::**

Since Kalkınma Yatırım Menkul Değerler A.Ş. which is the subsidiary of the Bank is in liquidation process, the Bank has lost control over its subsidiary in accordance with the related provisions of TAS and TFRS and net investment value of Kalkınma Yatırım Menkul Değerler A.Ş. in liquidation has been reclassified to financial assets measured at fair value through other comprehensive income.

The Bank has participated 100% in Kalkınma Yatırım Varlık Kiralama Anonim Şirketi established on 28 May 2020 with a nominal capital of TL 50 and a 100% participation in the Kalkınma Girişim Sermayesi Portföy Yönetimi Anonim Şirketi established on 17 November 2020 with a nominal capital of TL 1,800.

In accordance with the Communiqué on the Preparation of Consolidated Financial Statements of Banks and the Turkish Accounting Standards, Kalkınma Girişim Sermayesi Portföy Yönetimi Anonim Şirketi and Kalkınma Yatırım Varlık Kiralama Anonim Şirketi are consolidated in the consolidated financial statements by full consolidation method as of December 31, 2020.

As the subsidiaries Maksan A.Ş. and Türk Suudi Holding A.Ş. are not financial institutions, they are not consolidated using the equity method in the consolidated financial statements within the scope of the Communiqué on Preparation of Consolidated Financial Statements of Banks.

**VII. Current or Likely Actual or Legal Barriers to Immediate Transfer of Equity or Repayment of Debts Between the Bank and Its Subsidiaries:**

As explained above, Kalkınma Yatırım Menkul Değerler A.Ş. is in liquidation process, and transfer of equity is expected to be made at the end of the liquidation process.

## **SECTION THREE**

### **ACCOUNTING POLICIES**

#### **I. Explanations on Basis of Presentation:**

##### **a. The preparation of financial statements and related notes according to Turkish Accounting Standards and Regulation on the Procedures And Principles Regarding Banks Accounting Practices and Maintaining Documents:**

As prescribed in the Article 37 of the Banking Act No. 5411, the Bank prepares its financial statements and underlying documents in accordance with the “Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks” and other regulations, explanations and circulars on accounting and financial reporting principles announced by the Banking Regulation and Supervision Agency (“BRSA”) and Turkish Accounting Standards (“TAS”) and Turkish Financial Reporting Standards (“TFRS”) published by Public Oversight Accounting and Auditing Standards Authority (“POA”) except for matters regulated by BRSA legislation (together referred as “BRSA Accounting and Reporting Legislation”).

In accordance with the “Communiqué on Publicly Announced Financial Statements, Explanations and Notes to These Financial Statements”, published in the Official Gazette No. 30673, dated 1 February 2019, accompanying financial statements are aligned with latest financial statement format.

##### **b. Changes in accounting policies and disclosures:**

TMS / TFRS changes, which entered into force as of 1 January 2021, do not have a significant effect on the accounting policies, financial status and performance of the Bank. TMS and TFRS changes, which were published but not put into effect as of the final date of the financial statements, will not have a significant effect on the accounting policies, financial status and performance of the Bank. In addition, the Indicator Interest Rate Reform - 2nd Stage, bringing changes in TFRS 9, TAS 39, TFRS 7, TFRS 4 and TFRS 16, effective from 1 January 2021, was published in December 2020 and early implementation of the changes is allowed. With the amendments made, certain exceptions are provided for the basis used in determining contractual cash flows and the provisions of hedge accounting. It is anticipated that the changes will not have a significant impact on the Bank's financials. On the other hand, the process for the Indicative Interest Rate Reform is expected to be completed as of 31 December 2021, and the Bank's work continues within the scope of adaptation to the changes.

##### **c. Other issues:**

The new coronavirus disease (COVID-19), which emerged in the People's Republic of China in the end of December 2019 and spread to other countries, was declared as a pandemic on March 11, 2020 by the World Health Organization. In order to keep the negative economic effects of the epidemic to minimum, some measures are taken both in our country and around the world. The effects of these developments on the Bank's financial status and activities are closely monitored by the relevant units and the Bank's Top Management.

#### **II. Basis of Valuation Used in the Preparation of Financial Statements:**

Accounting policies for the preparation of financial statements and valuation principles used are applied in accordance with BRSA Accounting and Reporting Legislation.

Those accounting policies and valuation principles are explained below notes through II - XXIII.

Except for the financial assets and liabilities carried at fair value, the unconsolidated financial statements have been prepared in thousand of Turkish Lira (“TL”) under the historical cost.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**III. Explanations on Utilization Strategy of Financial Instruments and Foreign Currency Transactions:**

The majority of the liabilities of the balance sheet of the Bank consists of funds obtained from domestic and international markets. The majority of funds obtained domestically consists of funds provided by Export Credit Bank of Turkey, international institutions such as World Bank, Islamic Development Bank and German Development Bank via Republic of Turkey Ministry of Treasury and Finance and budget originated funds and the rest consists of funds provided through short-term money market transactions within the framework of balance sheet management. The Bank acts as an intermediary for those funds provided by the Republic of Turkey Ministry of Treasury and Finance to be utilized in various sectors. The funds obtained internationally consist of medium and long term loans borrowed from World Bank, and European Investment Bank and Council of European Development Bank, Islamic Development Bank, Japan International Corporation Bank, Black Sea Trade and Development Bank, Industrial and Commercial Bank of China, Asian Infrastructure Investment Bank and German Development Bank.

During the utilization of the funds obtained, the Bank pays attention for utilization of loans in line with borrowing conditions while taking assets-liability mismatch into account, and tries to avoid maturity, exchange rate and liquidity risks. Exchange rate risk, interest rate risk and liquidity risk are measured and monitored on a regular basis, necessary measures are taken as a result of changes in the market data and balance sheet management is performed within the predetermined risk limits and legal limits.

A non-speculative exchange rate position risk management is applied to limit the Bank's exchange rate risk. For that reason, during the determination of the allocation of balance sheet and off-balance sheet assets according to currencies, foreign currency management policy is applied in the most effective way.

Commercial placements are directed to high-profit and low-risk assets by taking Bank-specific and domestic economic expectations, market conditions, expectations and inclinations of loan customers, risks like interest, liquidity, exchange rate etc. into account, and safety policy is kept in the foreground for placement activities. Basic macro goals concerning balance sheet sizes are determined during budgeting and the transactions are carried out according to work programs prepared in this context.

The exchange rates, interest and price movements are closely monitored; transaction and control limits that are developed from the Bank's previous experiences are based on when taking positions as well as legal limits. In this way, limit excesses are prevented.

During foreign currency transactions, procedures detailed below are applied.

- a. Foreign currency monetary assets and liabilities are translated to Turkish Lira (TL) with the buying exchange rates announced by the Bank at the end of period and foreign exchange differences are accounted as foreign exchange gain or loss.
- b. There is no exchange rate differences capitalized as of the balance sheet date.
- c. Basic principles of exchange rate risk management policy: Decisions to avoid exchange rate and parity risks are taken by the Asset- Liability Committee that meets regularly. The decisions are in line with the models prepared in the context of the basic boundaries of Foreign Currency Net General Position/Shareholders' Equity Ratio which is included in legal requirements, and those decisions are carried out carefully. To avoid parity risk, foreign exchange position is managed by taking singular and general positions.
- d. Foreign currency transactions are calculated using the exchange rates prevailing at the dates of transactions and the profit/losses are included in the statement of profit or loss of the related period.

**IV. Explanations on Subsidiaries and Affiliates:**

Subsidiaries and affiliates are accounted at cost in the unconsolidated financial statements and if any, provisions for impairment losses are deducted in accordance with TAS 27.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**V. Explanations on Futures, Options Contracts and Derivative Instruments:**

The Bank has no derivative instruments that can be separated from the host contract. Derivative financial instruments are recorded with the fair value at the date of agreement and valued at fair value in the following reporting periods. In addition, the receivables and payables arising from these transactions are accounted for at off-balance sheet accounts. Depending on valuation difference being positive or negative, measurement differences are presented on the related balance sheet accounts.

**VI. Explanations on Interest Income and Expenses:**

Interests are recorded according to the effective interest rate method (rate equal to the rate in calculation of present value of future cash flows of financial assets or liabilities).

If a financial asset possesses on uncollected interest accrual before its acquisition by the Bank, interest collected afterwards is separated into periods such as before its acquisition and after acquisition, and only the part of after acquisition is recognized as interest income on the statement of profit or loss.

The Bank does not cancel the interest accruals and rediscounts of loans and other receivables that have become non-performing loans within the framework of the effectuated in 1 January 2018 “Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves” published in the Official Gazette dated 22 June 2016 and numbered 29750 and monitors said amounts in interest income. Within the scope of TFRS 9 methodology, the expected loss provision is calculated based on the interest accruals and rediscounts added amounts.

**VII. Explanations on Fees and Commission Income and Expenses:**

Fees and commissions received from cash loans, that are not attributable to interest rates applied, and fees for banking services are recorded as income on the date of collection. Fees and commissions paid for the funds borrowed, which are not attributable to interest rates of the funds borrowed, are recorded as expense on the date of the payment. All other commission and fee income and expenses, are recorded on an accrual basis. Earnings in return of agreements or as a result of services provided for real or legal third parties for purchase or sale of assets are recorded as income when collected.

**VIII. Explanations on Financial Assets:**

Financial assets mainly constitute the Bank’s commercial activities and operations. These instruments have the ability to expose, affect and diminish the liquidity, credit and interest rate risks in the financial statements.

The Bank adds its financial assets to the financial statements in accordance with the provisions of the “Importing and Excluding the Financial Statements” section of the TFRS 9 Standard and subtracts them from the financial statements.

Financial assets are included in the statement of financial status when they become a party to the terms of the contract related to the financial asset and measured at fair value for the first time (excluding trade receivables under TFRS 15 Customer Contracts Revenue).

In accordance with the classification provisions of the TFRS 9 Financial Instruments Standard, in subsequent accounting financial assets are measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss by;

- The business model used by the entity for the management of financial assets,
- Properties of contractual cash flows of a financial asset.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VII. Explanations on Financial Assets (Continued):**

Business Model Test and Cash Flow Characteristics Test are performed to determine the classification of financial assets. Purchase and sale transactions of these financial assets are accounted according to their “delivery date”. The classification of financial assets is decided on the date of their acquisition, taking into account “Testing of Contractual Cash Flows Only Interest and Principal and Evaluation of Business Model”. When the business model used for the management of financial assets is changed, all financial assets affected by this change are reclassified.

***Financial Assets Measured at Fair Value through Profit and Loss:***

Financial assets whose fair value differences are reflected in profit / loss are mainly for a short-term securities acquired for the purpose of being sold or bought back in the near future.

Financial assets whose fair value difference is reflected in profit / loss are reflected to the balance sheet at their cost values and are subject to valuation at fair value following their recording. Fair values for securities traded on Borsa Istanbul (BIST) are found using the weighted average clearing prices formed on BIST at the balance sheet date.

Gains or losses resulting from the valuation of financial assets whose fair value difference is reflected in profit / loss are reflected in profit / loss accounts. The positive difference between the acquisition cost and discounted value during the holding of financial assets for trading purposes is recorded in “Interest Income”, if the fair value of the asset is above its discounted value, the positive difference is recorded in the “Capital Market Transactions Profits” account and if it is below, the negative difference is recorded in the “Capital Market Transactions Losses” account.

***Financial Assets Measured at Fair Value Through Other Comprehensive Income:***

Financial assets are classified as financial assets at fair value through other comprehensive income where the business models aim to hold financial assets in order to collect the contractual cash flows and selling assets and the terms of financial asset give rise to cash flows that are solely payments of principal of interest at certain dates.

Financial assets measured at fair value through other comprehensive income are initially recognized at cost including the transaction costs. After initial recognition, valuation of the financial assets at fair value through other comprehensive income is based on fair value. For securities traded on Borsa Istanbul (BIST), fair values are found by using the weighted average settlement prices in BIST at the balance sheet date.. In the case a price does not occur in an active market, it is accepted that fair value cannot be reliably determined and amortised cost which is calculated by using the effective interest rate method is accepted as the fair value.

The difference between the cost and fair value is accounted as interest income accrual or impairment loss. Interest income for financial assets measured at fair value through other comprehensive income with fixed or floating interest rate shows the difference between cost and amortised cost calculated by using the effective interest rate method and accounted for as interest income from marketable securities. Unrealized gains and losses arising from changes in fair value of the financial assets measured at fair value through other comprehensive income and which are denoting the difference between fair value and amortised cost of financial assets, are recognized in the “Accumulated Other Comprehensive Income or Loss that will be Reclassified to Profit or Loss” and amounts accounted for under equity are reflected to income statement when financial assets are sold.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VIII. Explanations on Financial Assets (Continued):**

***Equity Instruments Measured at Fair Value Through Other Comprehensive Income***

During the first registration an irreversible preference can be made about reflecting the changes in the fair value of the investment in an equity instrument within the scope of TFRS 9, which are not held for commercial purposes or that are not contingent on the financial statements of the acquirer in a business combination where the TFRS 3 Business Combinations standard is applied in the other comprehensive income. The choice in question is made separately for each financial instrument.

The relevant fair value differences recognized in the other comprehensive income statement are not transferred to profit or loss in the following periods, but are transferred to previous periods' profit / loss. Dividends from such investments are included in the financial statements as profit or loss unless they are explicitly a part of the investment cost recovery. TFRS 9 impairment provisions are not valid for equity investments.

Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

***Financial Investments Measured at Amortised Cost and Loans:***

***Financial Investments Measured at Amortised Cost***

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are classified as financial assets measured at amortized cost.

Financial assets measured at amortised cost are subsequently measured at amortised cost by using effective interest rate method, and they are accounted for by setting forth provision for impairment loss or by posting interest income accrual. Interests received from financial assets measured at amortised cost are recognized as interest income.

***Loans***

Loans represent unquoted financial assets in an active market that provide money, goods or services to the debtor with fixed or determinable payments.

Loans are initially recognized with cost and carried at amortised cost calculated using the effective interest rate method at the subsequent periods. Transaction fees, dues and other expenses paid for loan guarantees are considered as a part of the transaction cost and reflected to the customers.

Cash loans granted by the Bank consist of investment and working capital loans and loans given through banks and leasing companies (APEX method).

Foreign currency indexed loans are converted into Turkish Lira with the exchange rate on the opening date and followed in Turkish Currency accounts. Repayments are calculated by using the exchange rates at the repayment dates and exchange differences are recognized under the foreign currency income and expense accounts.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VIII. Explanations on Financial Assets (Continued):**

The loan portfolio is regularly monitored by the Bank's management and if there are any suspicions about the inability to collect the loans granted, the loans accepted as troubled and are classified in accordance with Regulation on the Procedures and Principles for Classification of Loans and Provisions to be Set Aside published in the Official Gazette dated 22 June 2016 and numbered 29750 and the latest changes dated 18 October 2018 and numbered 30569 and TFRS 9.

With The Türkiye Kalkınma ve Yatırım Bankası A.Ş. Law dated 24 October 2018 and numbered 7147, the first paragraph of the Article 53 of the Banking Law No: 5411 is decided not to be enforced to the Bank and the Bank's Board of Directors is stated to determine the procedures and principles regarding the classification, monitoring, follow-up, provision ratios and collaterals of loans. In this context the Bank has decided to perform the classification and provisioning of loans in accordance with the TFRS 9 Standard and the Regulation on Provisions and Principles Regarding the Classification of Loans and Provisions to be Set Aside.

***Cash and Cash Equivalents:***

Cash and cash equivalents are cash on hand, demand deposits and other highly liquid short-term investments with maturity of 3 months or less following the date of purchase, which is readily convertible to a known amount of cash, and does not bear the risk of significant amount of value change. The carrying amounts of these assets represent their fair values.

**IX. Explanations on Impairment of Financial Assets:**

As of 1 January 2019, the Bank recognizes provisions for impairment in accordance with TFRS 9 requirements according to the “Regulation on the Procedures and Principles for Classification of Loans and Provisions to be Set Aside.” In this framework, the method of allocating credit provisions applied within the framework of the relevant legislation of BRSA has been replaced with the expected credit loss model.

Expected credit loss (ECL) model is used for instruments (such as bank deposits, loans and leasing receivables) recorded in other comprehensive income statement over amortized cost or fair value and in addition for financial lease receivables that cannot be measured at fair value through profit / loss, contract assets, credit commitments, and financial guarantee contracts.

The guiding principle of the ECL model is to reflect the general outlook of the increase or improvement in credit risk of financial instruments. The amount of ECLs defined as loss provision or provision depends on the degree of increase in credit risk since the loan was first issued.

Within the scope of TFRS 9 Financial Instruments, three basic factors regarding the measurement of expected credit loss are taken into consideration. These,

- (a) the amount weighted according to the neutrality and probabilities determined by evaluating the possible outcome range,
- (b) time value of money,
- (c) reasonable and supportable information on past events, current conditions and forecasts of future economic conditions that can be obtained without incurring excessive cost or effort as of the reporting date.

Taking into consideration these three factors, the Bank's historical data is modeled and the expected loss amount is calculated for each loan. Since the expected loss represents the future value, the present value of this amount is calculated with the discounting factor.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**IX. Explanations on Impairment of Financial Assets (Continued):**

In order to reflect the changes in credit risk since the initial recognition of credit risk, the loss provision is updated at each reporting date in which the expected loss calculations are performed.

The Bank assesses whether there has been a significant increase in credit risk in the financial instrument for the first time since it was included in the financial statements. In making this assessment, the Bank uses the change in default risk during the expected life of the financial instrument. To make this assessment, the Bank compares default risk related to the financial instrument as of the reporting date and the default risk related to the financial instrument for the first time in the financial statements and takes into consideration reasonable and supportable information which can be obtained without incurring excessive costs or efforts and is reasonable indication of significant increases in credit risk since its introduction for the first time.

In the TFRS 9 impairment, a 3-step approach is used in which the credit risk level increases at each stage:

Stage 1: It refers to all accounts that have not shown any deterioration in credit quality since the loan was issued. All accounts defined as having low credit risk will be classified as Stage 1 without periodically checking whether there is a significant increase in credit risk. A 12-month provision calculation is performed for all accounts classified in Stage 1.

Stage 2: Refers to all accounts showing significant deterioration in credit quality since the loan was issued. For all accounts classified in Stage 2, lifetime provision calculations are performed.

Stage 3: Refers to all impaired assets. For all accounts classified in Stage 3, lifetime provision calculations are performed.

TFRS 9 requires a 12-month compensation for all loans in stage 1, and a lifetime provision for all remaining loans.

**Significant Increase in Credit Risk**

If the customers classified as Stage 1 meet the following criteria, it has been decided by the Bank to be classified under Stage 2:

- The number of delay days of the customer is over 30
- Restructuring of the debtor with financial difficulties by granting concession
- Customer has close monitoring criteria
- There is a 35 percent or more decrease in the quantitative score to be calculated by considering the end-of-year financial statements for the customer every year, and the score in question drops below 40 (a significant increase criterion in credit risk).

Customers are periodically evaluated (at least once a year) and their ratings are updated in order to evaluate the criterion of significant increase in credit risk. The evaluation period is shortened for the borrowers for whom a significant deterioration signal is received in credit risk during the year.

Classification criterias under Stage 2 work for all bank customers, in addition, in case of negative market intelligence, classification can be made under Stage 2. This process continues under TFRS 9. The classification rules determined within the scope of TFRS 9 work for all portfolios.

Treasury and Banks portfolios are among the low default portfolios, and it is decided by the Bank to classify the assets in this portfolio under Phase 1 until an opposite assessment is made.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**IX. Explanations on Impairment of Financial Assets (Continued):**

**Significant Increase in Credit Risk (Continued)**

The decrease of customer rating score calculated according to the credit rating model used within the bank for the quantitative criteria related to the significant deterioration in the credit risk specified in Article 4 of the provisions regulation regarding the classification of the loans, by 35 percent and above, and the fall of score in question below 40, is determined by the Bank as the criterion of significant deterioration. In addition to these criterias, the restructuring applied to the customer who has financial difficulties specified in Article 7 of the Regulation on the Procedures and Principles for Classification of Loans and Provisions to be Set Aside is used as a classification criterion under Stage 2.

**Definition of Default**

“When defining the default for the purpose of determining the default risk according to TFRS 9, the entity uses a default definition consistent with the definition used for the credit risk management purposes of the related financial instrument and, if appropriate, takes into account qualitative indicators (eg financial commitments). However, unless the entity has reasonable and supportable information that reveals that default will occur when there is a longer delay, there is an otherwise demonstrable pre-acceptance that the default will not occur after the financial instrument expires after 90 days. The definition of default used for these purposes is applied consistently to all financial instruments unless information that proves that another definition of default is more appropriate for a particular financial instrument is available.” According to the article, the definition of default is used within the scope of modeling.

The definition of default used in the Bank is as follows:

- Customers with more than 90 days of delay (The number of customer delay days represents the highest number of delay days of the customer's existing loans on the relevant reporting date.)
- Compensation of the letter of guarantee received by the bank for collateral
- Customers considered to be at high risk by the bank

With the BRSA’s decision numbered 8948 dated 17 March 2020, numbered 8970 dated 27 March 2020 and numbered 9312 dated 8 December 2020, within the scope of the 4th and 5th articles of the Regulation on Provisions and Principles Regarding the Classification of Loans and Provisions to be Set Aside, the 30 days delay period foreseen for classification in the Stage 2 is allowed to be applied as 90 days and the 90 days delay period foreseen to be classified as non-performing loans is allowed to be applied as 180 days. As stated in the relevant decisions, the Bank allocated provisions according to its own risk model for the loans within the scope of this application, which will be valid until 30 June 2021.

**12 Month Expected Loss**

12-month loan loss corresponds to a part of the expected loan loss that may arise from the possible default status of the loan within 12 months of the reporting date.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**IX. Explanations on Impairment of Financial Assets (Continued):**

**Lifetime Expected Loss**

Lifetime losses arise from all possible default events that may occur during the expected life span of the financial instrument after the reporting date. Life expectancy is related to the maturity of the financial instrument.

One of the risk parameters to be used in calculating the provision amounts to be set as per TFRS 9 is the Probability of Default (PD) information. Probability of Default refers to the possibility of a live loan falling into default. PD calculation is carried out by considering past data, current conditions and prospective macroeconomic expectations.

Specifically, while calculating PD, qualitative, quantitative scores, sector, bank degree and macro effect are taken into account. For the company whose quantitative evaluation is made, an objective score is produced between 0 and 100. The sector in which the company operates is determined in accordance with the NACE code (Statistical Classification of European Community Economic Activities; a reference resource for the purpose of producing and disseminating statistics on economic activities in Europe.).

After the qualitative and quantitative scores of the company are determined, the mentioned points are weighted according to the company scale and the company's score is calculated.

Banks, on the other hand, are ranked objectively by considering various criteria, namely capital, asset quality, liquidity, profitability, income-expenditure structure and capacity.

Finally, for the macro effect, a volatility index is calculated first, and then variables that act in parallel and play a role in the measurement of crisis probabilities before sudden financial shocks are identified. Afterwards, the index is created by weighting the determined variables according to the success rate.

The macro effect ultimately applied to the customer scores by the Bank is the macro note calculated on the company grade (non-macro score) calculated as a result of qualitative (partnership information, group of companies, etc.) and quantitative (liquidity, financial structure, profitability etc.) assessment of each customer. In line with the customer's score, corrections are applied. In this context, studies to determine pioneering vulnerability indicators of Turkey's economy are made and by the Bank it has been identified that some of the variables derived from various areas of the economy successfully predicted crisis periods in advance. This prediction has been accepted by the Bank as the threshold values are exceeded and the signal is produced starting at least 12 months before the crisis.

In order to obtain the macroeconomic score, which is calculated by considering the positive and negative scenarios as well as the base scenario value, values are calculated at a certain margin in accordance with the distribution of the series for positive and negative scenario values from the index values distributed between 0-100 and averaged over 12 months.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**IX. Explanations on Impairment of Financial Assets (Continued):**

Due to the COVID-19 epidemic, which has influenced the whole world, since mid-March 2020, many enterprises have suspended their operations for a certain period of time or certain sectors have been restricted within the framework of measures taken to create remote working conditions. It is known that many enterprises will be negatively affected by this situation, but the extent of this effect can not be predicted. The Bank analyzed the effects of COVID-19 to the sectors which the loans in the loan portfolio are used, and updated the sector parameters with the assumption that the foreseen risk was not systematic and reflected the epidemic effect to TFRS 9 parameters by considering the relationships between TFRS 9 parameters and sectoral risk level.

**X. Explanations on Offsetting of Financial Assets and Liabilities:**

Financial assets and liabilities are offset on balance sheet when the Bank has a legally enforceable right to set off, and the intention of collecting or paying the net amount of related assets and liabilities or the right to offset the assets and liabilities simultaneously.

**XI. Explanations on Sales and Repurchase Agreements and Lending of Securities:**

Securities sold in repurchase agreements (repo) are followed in the balance sheet accounts in line with Uniform Chart of Accounts. Accordingly, the government bonds and treasury bills sold to the clients in the context of repurchase agreements are classified as “Subject to Repurchase Agreements” and are valued at fair values or at discounted values using effective interest rate method according to the holding purposes in the Bank portfolio. Funds gained by repurchase agreements are shown separately in the liability accounts and interest expense accrual is calculated for these funds.

Securities that were purchased to resell commitment (reverse repurchase agreements) are shown as a line item under ‘Money Market Placements’ line. For the difference between the purchase of securities and resale prices of the reverse repo agreements for the period; income accrual is calculated using the effective interest rate method. There are no marketable securities lending transactions.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XII. Explanations on Fixed Assets Held for Sale and Discontinued Operations and Related Liabilities:**

Assets that are classified as held for sale (or the disposal group) are measured at the lower of its carrying amount and fair value less costs to sell. Depreciation on these assets is stopped, and these assets are disclosed separately in the balance sheet. In order to classify a tangible fixed asset as held for sale, the asset (or the disposal group) should be available for an immediate sale in its present condition subject to the terms of any regular sales of such assets (or such disposal groups) and the sale should be highly probable. For a highly probable sale, the appropriate level of management must be committed to a plan to sell the asset (or the disposal group), and an active program to complete the plan should be initiated to locate a customer.

Also, the asset should have an active market sale value, which is a reasonable value in relation to its current fair value. Events or circumstances may extend the completion of the sale more than one year. Such assets (or the disposal group) are still classified as held for sale if there is sufficient evidence that the delay in the sale process is due to the events and circumstances occurred beyond the control of the entity or the entity remains committed to its plan to sell the assets. The Bank has no assets classified as held for sale.

A discontinued operation is a component that either has been disposed of, or is classified as held for sale. Gains or losses relating to discontinued operations are presented separately in the income statement. The Bank has no discontinued operations.

**XIII. Explanations on Goodwill and Other Intangible Assets:**

As at the balance sheet date, there is no goodwill recorded in the unconsolidated balance sheet of the Bank.

Intangible fixed assets first are carried at cost which includes acquisition costs and other direct costs bearded necessary for the assets to become ready for use. Subsequent to recognition, intangible assets are presented in financial statements at cost less any accumulated amortization and accumulated impairment losses, if any.

Amortization is charged on a straight-line basis over their estimated useful lives which is 33,33%. Useful life of other intangible assets are determined by the consideration of items like expected usage period of the asset, technical, technological or other kind of obsolesce and maintenance costs incurred to obtain economic benefit from the assets.

Expenses related to existing computer software and computer software improvement that enhance original content and useful life, are capitalized over the software. Those capitalized expenses are amortised over the remaining useful life of the related assets using the “straight line method”.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XIV. Explanations on Tangible Fixed Assets::**

Tangible fixed assets are carried at cost which includes acquisition costs and other direct costs beared necessary for the assets to become ready for use, and if results of appraisal reports exceed the costs, they are not subject to any revaluation. Subsequent to recognition, tangible fixed assets are presented in financial statements at cost less any accumulated depreciation and accumulated impairment losses, if any.

The Bank's tangible fixed assets purchased before 1 January 2005 are carried at restated cost in the balance sheet before 31 December 2004 and its tangible fixed assets that are purchased subsequently are valued at historical cost.

Gain or loss arising from the disposal or retirement of an item of tangible fixed assets is determined as the difference between the sales proceeds and the carrying amount of that asset and is recognized in profit or loss.

Ordinary maintenance and repair expenses of tangible fixed assets items are recognized as expenses. Investment expenditures that increase the future benefit by enhancing the capacity of tangible assets are capitalized. Investment expenditures include cost items that extend the useful life of the asset, increase the servicing capabilities of the asset, improve the quality of goods or services produced or reduces the costs. There is no pledge, mortgage and other restriction on the tangible fixed assets or given for the purchase commitments or any restrictions on the rights for the use of these.

Tangible fixed assets are amortised by using the straight-line method over their estimated useful lives. Estimated depreciation rates of tangible fixed assets are as follows.

	<u>Estimated Useful Life (Years)</u>	<u>Amortization Rate (%)</u>
Building	50	2
Safes (vaults)	50	2
Vehicles	5	20
Other Tangible Assets	3-15	6,66-33,33

There is no change in accounting estimations that has material effect in the current period or that is expected to have effect in the subsequent periods.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XV. Explanations on Leasing Transactions:**

The “IFRS 16 Leases” Standard was published in the Official Gazette dated 16 April 2018 and numbered 29826 to be applied on 1 January 2019.

The Bank as a lessee

The “IFRS 16 Leases” Standard removes financial lease and operational lease distinction for lessees and introduces a single accounting model for all leasing transactions. According to the standard, the lessees reflect a “asset that gives the right to use” and a “lease obligation” to the financial statements at the date when the lease actually begins. The initial cost of the asset that gives the right to use is measured by deducting the lease incentives from the sum of the lease obligation and the initial direct costs incurred by the lessees. The cost method is used for the measurements after the beginning of the lease. In this method, the asset that gives the right to use is measured by deducting the accumulated depreciation and accumulated depreciation provisions from the cost value. The lease obligation is initially measured at the present value of the lease payments to be made during the lease period. In subsequent measurements, the book value of the liability is increased to reflect the interest on the lease obligation and decreased to reflect the lease payments made. IFRS 16 has made exemptions for leases of 12 months or less and leases related to low value assets.

The Bank, which is a lessee in financial leasing transactions, accounts for all lease transactions longer than 12 months as assets and liabilities in the statement of financial position. Depreciation expense related to the leased asset and interest expense in lease payments are reported in the income statement. The lease obligation was initially measured at the present value of the lease payments to be made during the lease period using the Bank's TL alternative source cost.

The Bank as a lessor

According to the “IFRS 16 Leases” Standard, financial lease and operational lease distinction continues for the lessor. If the lessor transfers the significant risks and benefits arising from ownership of the asset subject to the lease to the lessee, he will classify it as a financial lease. Other leases will be classified as operational leases. The receivables that arise from leasing the assets of the Bank, which are not included in financial lease transactions and which are not used in banking transactions, are followed up in the receivables from the leasing transaction and are accounted on an accrual basis.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XVI. Explanations on Provisions and Contingent Liabilities:**

In the financial statements, a provision is made for an existing commitment resulted from past events if it is probable that the commitment will be settled and a reliable estimate can be made of the amount of the obligation.

Provisions other than the expected credit loss set for loans and other receivables and contingent liabilities are accounted for in accordance with “Turkish Accounting Standard on Provisions, Contingent Liabilities and Contingent Assets” (TAS 37).

For transactions that can affect financial structure, provisions are provided by using the existing data if they are accurate, otherwise by using the estimates.

**XVII. Explanations on Employee Benefit Liabilities:**

Obligations for employee benefits are recognized in accordance with the TAS19 “Employee Benefits”.

There is no fund to which the Bank personnel are members. However, some personnel are members of Personnel Assistance and Additional Social Security Foundation of Türkiye Kalkınma Bankası A.Ş. and the Bank has no obligations regarding this foundation, accordingly no provision is reserved in the accompanying financial statements.

Under the Turkish legislation as supplemented by union agreements, lump sum payments are made to all employees who retire or whose employment is terminated without due cause. In accordance with the working status of the Bank and the social security institution legislation, the retirement pension is related to the ones related to the Law No: 5434 and the severance payment is calculated to those related to the Law No: 1475.

The principal assumption is that the maximum liability for each year of service will increase parallel with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. Consequently, in the accompanying financial statements as of 31 March 2021, the provision has been calculated by estimating the present value of the future probable obligation of the Bank arising from the retirement of the employees. The provisions at the respective balance sheet date have been calculated with a discount rate of 2,4% (31 December 2020: 2,4%). As the maximum liability is revised semiannually, the maximum amount of full TL 7.638,95 effective from 1 January 2021 has been taken into consideration in calculation of provision from employment termination benefits (31 December 2020 full TL 7.638,95).

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XVIII. Explanations on Taxation:**

*Current Tax*

The valid corporate tax rate in Turkey is 20% as of March 31, 2021. However, with the Temporary Article 13 added to the Corporate Tax Law No: 5520 and with the Article 11 of the Law on the Procedure of Collection of Public Claims and the Law on the Amendment of Some Laws, which entered into force after being published in the Official Gazette dated April 22, 2021 and numbered 31462, the Corporate Tax rate will be applied as 25% for the corporate earnings for the 2021 taxation period and 23% for the corporate earnings for the 2022 taxation period. This change will be valid for the taxation of corporate earnings for the periods starting from January 1, 2021, starting with the declarations that must be submitted as of July 1, 2021. Since the tax rate change will come into effect as of April 22, 2021, 20% has been used as the tax rate in the period tax and deferred tax calculations in the financial statements dated March 31, 2021. If the period tax of the Bank was calculated over the new rate for the first three-month interim period, it is estimated that the deferred tax asset would increase by TL 2.088, tax liability for profit of the period would increase by TL 11.943 and the deferred tax expense would increase by TL 1.054. The corporate tax rate is applied to the tax base to be found as a result of adding the non-deductible expenses to the commercial earnings of the companies, the exemption (such as the participation earnings exemption) and the deduction of the deductions in the tax laws. No further tax is paid if the profit is not distributed. Non-resident corporations' income through a permanent establishment or permanent representative in Turkey and dividends paid to companies resident in Turkey (dividends) not subject to withholding. Dividend payments made to individuals and institutions other than these are subject to 15% withholding tax. Addition of profit to capital is not considered as profit distribution and withholding tax is not applied.

Corporations are required to pay advance corporate tax quarterly on their corporate income. Advance tax is declared by the 17th and paid by the 17th day of the second month following each calendar quarter end. Advance tax paid by corporations for the current period is credited against the annual corporation tax calculated on the annual corporate income in the following year.

Despite the offset, if there is temporary prepaid tax remaining, this balance can be refunded or used to offset any other financial liabilities to the government. According to 5.1.e. Article of Corporation Tax Law which is important tax exemption that is applied by banks, corporations' 50% of revenues that occur from selling of their real estates, are in assets, that belong to the corporations at least two years (730 days), 75% of revenues that occur from selling their founding bonds that are belong to the corporations as long as time of participation stocks, redeemed shares and option to call are exempted from Corporation Tax. This exemption applies to the period the sale is made and the part of return on sales that benefits from the exemption is held in a special fund in the liabilities account until the end of the fifth year started from the following year sale is made. However, the sales payment must be collected until the end of the second calendar year following the year in which the sale is made. Taxes which are not realized in time due to the exemption that hits uncollected sales payment are considered as tax loss. Taxes which does not accrue on time because the applying exemption for the transfer of the expemted part of revenue to the other accounts with other ways out of capitalizing in five years or withdrawn from company or transferring from limited taxpayer corporations to the headquarters, are considered as tax loss. This is also be applicable in the condition of liquidation of business ( Except transfers and divisions that make according to this code).

Moreover, according to 5.1.f. article of Corporation Tax Law; corporations which have been fallen to legal proceedings because of owe to the bank or Savings Deposit Insurance Funds, and their warranters' real estates, participation stocks, founding bonds, redeemed shares, options to call of mortgagors' revenues that used for against debts or transferring to SDIF, 50% for real estates, and 75% for others are exempted from Corporation tax. Under the Turkish Corporate Tax Law, losses can be carried forward to offset against future taxable income for up to five years. Losses cannot be carried back to offset profits from previous periods. In Turkey, there is no procedure for a final and definitive agreement on tax assessments with tax authorities.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XVIII. Explanations on Taxation (Continued):**

***Current Tax (Continued)***

Corporate tax declarations are submitted to the related tax office until the evening of the 30th day of the fourth month following the end of the accounting period and the accrued tax is paid until the evening of the 30th day. However, the authorities competent for tax inspection can examine the accounting records within five years, and the tax amounts to be paid may change if any erroneous transaction is detected.

***Deferred Tax***

In accordance with TAS 12 “Turkish Accounting Standard Relating to Income Tax”, the Bank calculates and recognizes deferred tax for temporary differences between the bases calculated based on the accounting policies used and valuation principles and that calculated under the tax legislation. Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences. However, deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized as deferred tax liability or asset if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. The carrying amount of a deferred tax asset is reviewed on each balance sheet date. Carrying amount of a deferred tax asset can be reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered. It is calculated over the 20% corporate tax rate valid for the first 3-month accounting period of 2021, and will be calculated by taking into account the corporate tax rate in the following periods.

Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is associated directly with equity. Deferred tax asset and deferred tax liability are presented as net in these financial statements.

The income tax charge is composed of the sum of current tax and deferred tax charges. The current tax liability is calculated over taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible and it further excludes items that are never taxable or deductible.

According to the second paragraph of the Article 53 of the Banking Act No: 5411, all specific reserves for loans and other receivables are considered as deductible expense for determining corporate tax base.

The current tax payable is offset with prepaid tax, if they are associated with. Deferred tax assets and liabilities are also offset.

Deferred tax calculation is made within the scope of TFRS 9 for the first and second stage provisions.

**Transfer Pricing**

Transfer pricing is regulated through Article 13 of Corporate Tax Law titled “Transfer Pricing Through Camouflage of Earnings”. Detailed information for the practice regarding the subject is found in the “General Communiqué Regarding Camouflage of Earnings Through Transfer Pricing”. According to the aforementioned regulations, in the case of making purchase or sales of goods or services with relevant persons/corporations at a price that is determined against “arm’s length principle”, the gain is considered to be distributed implicitly through transfer pricing and such distribution of gains is not subject to deductions in means of corporate tax.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XIX. Additional Explanations on Borrowings:**

The Bank accounts its debt instruments in the subsequent periods, by using the effective interest rate method. The Bank has no borrowings that require hedging techniques for accounting and valuation of debt instruments and liabilities representing the borrowings.

The Bank continues its financial support that it provided and still providing by acquiring sources from domestic and international markets. Dormitory resources are provided from Central Bank of the Republic of Turkey, Turkey Export Credit Bank, international organizations such as World Bank, Islamic Development Bank and German Development Bank through the Ministry of Treasury and Finance. In addition to these, the Bank acts as an intermediary for the use of various budget-sourced funds domestically. The loan from this source has been disbursed and no new funds have been transferred from the Ministry of Treasury and Finance. The funds provided are recorded in the Bank's resource accounts on the transfer date. The maturity and interest rates of these funds are determined by the public authority through Investment Incentives Communiqués.

The present foreign funds of the Bank are medium and long term loans from World Bank, European Investment Bank, Council of European Development Bank, Islamic Development Bank, Black Sea Trade and Development Bank and Japan International Corporation Bank, Industrial and Commercial Bank of China, Asian Infrastructure Investment Bank and German Development Bank are recorded to related accounts on the date and with the cost of procurement.

The Bank generally prefers providing loans in parallel to the borrowing terms like maturity date, interest rate, interest type and currency type to avoid maturity, exchange rate and liquidity risks.

The Bank has not issued any convertible bonds and debt instruments.

**XX. Explanations on Shares Issued:**

The Bank does not have issued shares in the current period.

**XXI. Explanations on Bill Guarantees and Acceptances:**

Commitments regarding bill guarantees and acceptances of the Bank are presented in the “Off Balance Sheet” commitments.

**XXII. Explanations on Government Incentives:**

There are no government incentives utilized by the Bank in the current and prior period.

**XXIII. Explanations on Segment Reporting:**

As part of its mission, the Bank operates mainly in the areas of corporate banking and investment banking. Corporate banking provides financial solutions and banking services to customers with medium and large joint stock company status. Services offered include investment loans, project finance, TL and foreign exchange business loans, letters of credit and letters of guarantee.

Within the scope of investment banking activities, the Bank's treasury bills, government bond trading, repo transactions, money swaps and forward foreign exchange transactions, capital markets consultancy, financial consultancy, merger and purchase consultancy are performed. Among the investment banking operating income, revenues from Treasury transactions activities are included.

As of 31 March 2021, explanations on segment reporting in line with “Financial Statements to be Publicly Announced and the Accompanying Policies and Disclosures” are shown below.

## SECTION FOUR

### INFORMATION ON FINANCIAL STRUCTURE

#### I. Explanations on Equity:

Equity amount and capital adequacy standard ratio are calculated within the framework of "Regulation Regarding Equities of Banks" and "Regulation Regarding Measurement and Evaluation of Banks' Capital Adequacy".

The Bank's equity amount as of 31 March 2021 is TL 5.978.075 TL, (31 December 2020: TL 5.651.910) and its capital adequacy ratio is 21,04% (31 December 2020: 22,35%). The capital adequacy ratio of the Bank is above the minimum ratio determined by the relevant legislation.

#### Information on Equity Items:

**SECTION FOUR (Continued)**

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**II. Explanations Related to Currency Risk:**

The Bank is exposed to currency risk because of inconsistency of the foreign currency denominated asset and liability balances with respect to the transactions made in foreign currencies.

The Bank's currency risk management policy of the Bank defined as, keeping the "Foreign Currency Net General Position / Equity Standard" ratio within the legal boundaries with respect to the economic matters, trends in the market and financial position of the Bank. By keeping up with this main goal and with respect to asset and liability management, foreign currency denominated assets are appreciated with the most favorable interest rates in the foreign currency market.

Currency risk is calculated within the scope of the standard method used for legal reporting.

Besides, the exchange rate risk faced by the Bank on a daily basis is determined by preparing the foreign currency balance sheet by covering individual positions. Proforma foreign currency balance sheets are used for the measurement of the future exchange rate risks (including foreign currency-indexed assets and liabilities).

The Bank has no hedging derivative instruments for foreign currency denominated borrowings and net foreign currency investments.

A non-speculative foreign exchange position management policy is followed in order to limit the exposure of the currency risk. In this respect, distribution of foreign currency denominated on balance sheet and off balance sheet items are considered.

In order to reduce the risk of foreign exchange rate fluctuations affecting the financial structure of the bank, the risk of foreign exchange rate of the Bank is determined based on the Foreign Currency Net General Position / Equity ratio determined by the BRSA, which is 20%.

The foreign exchange buying rates of the Bank as of the date of the financial statements and the last five business days prior to that date are as follows:

<b><u>Date</u></b>	<b><u>USD</u></b>	<b><u>EURO</u></b>	<b><u>100 JPY</u></b>
31/03/2021	8,3251	9,7653	7,5511
30/03/2021	8,1395	9,5623	7,4259
29/03/2021	8,0093	9,4334	7,3238
26/03/2021	7,8975	9,3048	7,2408
25/03/2021	7,8856	9,3153	7,2591

The simple arithmetic average of the last thirty day rates as of 31 March 2021; USD: TL 7,595619, EURO: TL : 9,040855, 100 JPY: TL 7,007200.

## **SECTION FOUR (Continued)**

### **INFORMATION ON FINANCIAL STRUCTURE (Continued)**

#### **III. Explanations Related to Interest Rate Risk::**

The interest rate risk indicates the probability of loss that the Bank may incur due to the position of the financial instruments due to movements in the interest rates. Changes in interest rates affect the return on the assets and the cost of the liabilities. Interest rate risk arising from banking accounts, includes re-pricing risk, yield curve risk, base risk and option risk.

The interest rates determined by the market actors, especially the central banks, have a decisive role on the economic value of the Bank's balance sheet and on the Bank's income-loss balance. Sudden interest shocks in the market because the Bank to open the gap between the applied interest rate of the revenue generating assets and the interest paid on the liabilities. The opening of this gap may cause the Bank interest income to be adversely affected by fluctuations in market interest rates and may cause decrease in profitability of the Bank.

The Bank's basic principle in the interest rate risk management policy is to avoid mismatch and provide alignment between loans disbursed with fixed and floating rate and funds provided with fixed and floating rate. Accordingly, interest rate, currency and maturity alignment is respected during the disbursement of loans funded by foreign long-term borrowings, which form the material part of the loan portfolio. Almost the entire loan portfolio is financed by floating rate borrowings, thus interest rate risk from changes in interest rates seems not probable for the loan portfolio because of the correlation provided between the sources and the uses and other loans in the portfolio are financed by the equity of the Bank.

Within the framework of the Bank's basic principle of interest rate risk policy, optimization of portfolio distribution in the management of interest-sensitive assets other than loans is provided by considering possible changes in duration of positions and current interest rate limits; by taking into account alternative return, limits of tolerable loss and risk. In this context, to measure the interest rate risk exposure of the Bank, the effect of days to maturity and profit/loss are analyzed considering the scenarios of possible changes in interest rates for securities portfolio. Alternatives for compensation of probable losses that may arise as a result of fluctuations in interest rates are examined using different markets. Interest rate sensitivity analysis is also made for the positions besides securities portfolio.

There is no interest rate mismatch on loan portfolio as the main principle of interest rate adjustment on the source and disbursement side of the loan portfolio of the Bank. For this reason, the Bank's credit portfolio does not carry any interest rate risk even if it is affected by market volatility. Interest rate-sensitive items on the Bank's balance sheet are limited only to the size of the Financial Assets Measured at Fair Value Through Other Comprehensive Income within the liquid portfolio.

In order to minimize the possibility of unfavorable effects of market interest rate changes on the Bank's financial position, risk limits are used for the management of interest rate risk. These limits are set by Asset-Liability Committee and approved by Board of Directors. The Bank monitors and controls whether interest-sensitive assets are within the determined limits.

In order to minimize the likelihood that the change in market interest rates in the bank's securities portfolio management will cause adverse effects on the financial structure of the bank, limits have been set on the adjusted duration of the securities portfolio and the amount of daily loss that may arise from the securities portfolio.

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**III. Explanations Related to Interest Rate Risk (Continued):**

Based on the statutory 20% rate of "The Ratio of Interest Rate Risk Due To Banking Book" determined by the BRSA to the measurement and evaluation of the interest rate risk by using standard shock method, arising from the on-balance sheet and off-balance sheet positions in the banking book within the scope of the interest rate limits of the Bank, is determined with a more conservative approach.

Interest rate sensitivity of assets, liabilities and off-balance sheet items (based on days to repricing dates):

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**IV. Explanations Related to Equity Securities in Banking Book:**

None.

**V. Explanations Related to Liquidity Risk Management and Liquidity Coverage Ratio:**

**1. Liquidity risk management**

The Bank's liquidity management is managed by Treasury Department in coordination with related departments and the strategies constituted by Asset Liability Committee as part of "Risk Management Strategies, Policies and Application Principles" that is approved by the Board of Directors. The liquidity risk management as per the implementation principles are stated as follows:

Liquidity risk refers to the probability that the Bank will incur the consequential loss that it cannot anticipate or face unforeseeable, all cash flow requirements without affecting the day-to-day operations or financial structure.

Liquidity risk also represents the possibility of loss due to Bank's inability of settling with market prices since the lack of depth and excessive fluctuations in the market.

The main policy of Liquidity Risk Management in the Bank is to provide quality asset structure in which any liabilities can be fulfilled. Since the Bank is specialized, its liquidity need is more predictable as compared to commercial banks, and ensures cash flows provided for its liabilities more regularly.

The type, maturity structure and compliance of interest rates with assets and liabilities in the balance sheet, is assured within the framework of the Asset Liability Management Committee's decisions. The Bank keeps liquidity ratios within risk limits as set out in legal legislation and follows regularly.

In order to manage liquidity risk, proforma cash flows are set on the basis of predictable data by evaluating the maturities of asset and liability structure. Proper placement of liquidity excess considering alternative gains and meeting liquidity needs with the most appropriate cost of funding is essential.

Additionally, monthly proforma cash flows and balance sheet durations regarding the fulfilment level of medium and long term liabilities are traced in order to determine early factors that generate risk.

Mainly for risk measurement and monitoring activities to determine the level of liquidity risk;

The liquidity risk of the Bank is calculated by using "Liquidity Analysis Forms" in accordance with the format determined by the BRSA and reported to the BRSA on a weekly and daily basis.

Limits on liquidity risk are determined under; the legal limitations set out by the BRSA and the "Liquidity Emergency Plan Directive of the Bank". The Bank's "Liquidity Emergency Plan Directive" came into force with the decision of the Board of Directors dated 27 October 2016 and numbered 2016-20-10 / 180. Situations that require the implementation of the Liquidity Emergency Plan are followed by indicators derived from bank-specific (internal) and financial market developments. The Liquidity Emergency Plan includes actions to ensure that the Bank fulfills its obligations at its current level and to maintain liquidity at the level required by the Bank or to achieve liquidity at acceptable costs and to provide the necessary liquidity with the objective of protecting the Bank's reputation.

In the liquidity risk management of the Bank, the limitations within the scope of the relevant regulations of the BRSA and the internal risk limits determined within the framework of the Bank's "Risk Management Strategies, Policies and Implementation Principles" and general market conditions are determinants. Therefore, units active in liquidity risk management, especially the Treasury Unit, act within these limitations.

**SECTION FOUR (Continued)**

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**V. Explanations Related to Liquidity Risk Management and Liquidity Coverage Ratio (Continued):**

**1. Liquidity risk management (Continued):**

First limitation on legal requirements set by the BRSA is; as per the regulation on “Calculation of Liquidity Coverage Ratio”, minimum limits of 100% and 80% are assigned on consolidated and unconsolidated basis respectively for total and foreign currency limits. On the other hand investment and development banks are exempt from those limitations until BRSA has determined otherwise.

The Bank's internal reporting within the scope of liquidity risk management consists of daily, weekly and monthly reports that are prepared by Risk Monitoring Department. Daily balance sheet and duration calculations are prepared by Risk Monitoring Department. On weekly reports, which are prepared by the same department, liquidity limits are monitored. Weekly realized liquidity limits determined by Board of Directors is aggregated in monthly risk limits monitoring report. Those reports investigate legal risks and adaption of early warning limits. Also, to monitor liquidity risk in “TKB Riskness Analysis According to Selected Indicators and Risk Groups” report prepared monthly includes;

- Proforma Cash Flows Statement,
- Proforma Currency Balance Sheet,
- Duration of Balance Sheet Items, -in detail- Marketable Securities (by class of financial instruments),
- Summary of liquidity forms sent to BRSA by Financial Affairs Department. With proforma cash flows statement, amount of future liquid assets are shown in different scenarios for one year period.

Related report is presented to the Board of Directors; the Audit Committee and senior management on a monthly basis. By taking into consideration these reports, the Asset Liability Committee and Audit Committee evaluate the liquidity position of the Bank, and results of liquidity measurement system are included in the decision making process.

Regarding the liquidity risk, as well as legal limits, internal limits have been determined in accordance with its own internal procedures, mission and risk appetite, as included in the Bank's risk policies. These limits have been determined by the Board of Directors in excess of legal limits, including early warning limits, and are revised annually.

**2. Liquidity coverage ratio**

The Bank's liquidity coverage rates are prepared weekly by Financial Affairs Department in accordance with the "Regulation on Calculation of the Liquidity Coverage Ratio of Banks" published in the Official Gazette dated 21 March 2014 and numbered 28948, and reported to the BRSA. Including the reporting period for the last 3 months minimum and maximum levels of unconsolidated foreign currency and total liquidity coverage ratios are shown below by specified weeks:

**SECTION FOUR (Continued)**

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**V. Explanations Related to Liquidity Risk Management and Liquidity Coverage Ratio (Continued):**

**3. Explanations related to liquidity coverage ratio**

**Significant factors that impact the result of liquidity coverage ratio and change of the items in time that are taken into account in calculation of this ratio**

The significant factors that impact liquidity coverage ratio are net cash outflows and high quality assets stock. Items in the calculation of the ratio in consideration may be changed in time because of economic structure and decisions of the Bank fund management.

**The explanation about elements of the high quality liquid assets**

High quality liquid assets mostly consist of domestic government bonds and eurobonds.

**Content of funds and their composition**

The main funding source of the Bank is mid-long term loans from International Financial Institutions. The share of these resources in all funds is approximately 90,1%. 1,8% of the Bank's total funding consists of funds, and 8,1% consists of subordinated debt instruments.

**Cash outflows generating from derivative transactions and information about which transactions are subject to collateral margin**

Derivative transactions of the Bank are predominantly swap transactions. Income and expense figures related to derivative transactions made within the year are accounted in profit / loss from derivative financial transactions. There are no transactions that are likely to complete collateral.

**Counterparty and product-based funding sources and concentration limits on collateral**

The fund sources of the Bank, whose field of activity is development banking, are generally international development banks and financial institutions; there is no concentration limit on the other party and product basis.

**The operational and legal factors that hinder liquidity transfer which is needed by the bank itself, its foreign branch and its consolidated subsidiary, and respective liquidity risk**

None.

**SECTION FOUR (Continued)**

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**VI. Explanation Related to Leverage Ratio:**

In the current period, the rate of increase in Tier 1 capital was higher than the rate of increase in total risk amount. As of March 31, 2021, the Bank's leverage ratio calculated from the average of three months is 16,46% (31 December 2020: 15,29%). The reason why the leverage ratio of the current period is higher than the leverage ratio of the previous period is that the amount of Tier 1 capital has increased at a higher rate than the total risk amount related to on-balance sheet assets.

<b>On-balance sheet assets (*)</b>	<b>Cari Dönem (31.03.2021)</b>	<b>Önceki Dönem (31.12.2020)</b>

**VII. Explanations Related to Risk Management:**

**1. General information on risk management and risk weighted amounts:**

Footnotes and related explanations prepared in accordance with the “Communiqué on Disclosures About Risk Management to Be Announced to Public by Banks” published in the Official Gazette No: 29511 on 23 October 2015 and entered into force as of 31 March 2017 are given in this section. In accordance with the relevant communiqué, the following tables, which should be given quarterly, were not presented as of 31 March 2021, as the Bank's standard approach was used in the calculation of capital adequacy:

- RWA flow statement under IMM (Internal Model Method)
- RWA flow statements of CCR exposures under Internal Model Method (IMM)
- RWA flow statements of market risk exposures under an IMA

**Overview of risk weighted amounts:**

		Risk Weighted Amount		Minimum Capital Requirement

**2.1.ğ) Main principles of liquidating non-performing loans and other receivables:**

If there are collateral elements said in the fourth section of the Regulation on the Procedures and Principles Regarding the Classification of Loans and Provisions to be Reserved for them, these elements are converted into money as soon as possible as a result of both administrative and legal initiatives and the liquidation of the receivable is provided.

In the case collaterals are not present; the Bank is engaged in substantive intelligence in various periods to determine whether any property holdings are subsequently acquired in order to apply for legal procedures, even if there is evidence of insolvency for the debtor.

Before and after liquidation process; the Bank reviews financial information of the debtor companies. Then, in the case it is agreed that the companies show indications of operating on an ongoing basis and probably are going to have contributions to the economy; the Bank tries to make collections through rescheduling the payment terms.

**2.1.h) Explanations on write-off policy:**

Within the scope of the "Regulation Amending the Regulation on the Classification of Loans and the Provisions to be Set Aside", which entered into force after being published in the Official Gazette dated 27 November 2019 and numbered 30961, the portion of "Fifth Group-Loans in the Type of Loss" with life-time loss provision for which there is no reasonable expectation of recovery can be deducted from records within the scope of TFRS 9 as of the first reporting period following their classification in this group. As of March 31, 2021, the Bank does not have any credits deducted from the records.

## **SECTION SIX**

### **OTHER EXPLANATIONS**

#### **I. Explanations on Auditors' Review Report:**

The Bank's unconsolidated financial statements as of and for the period ended 31 March 2021 have been reviewed by KPMG Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş. and the review report dated 30 April 2021 is presented at the beginning of the financial statements and related notes.

#### **II. Explanations and Notes Related to Subsequent Events:**

The valid corporate tax rate in Turkey is 20% as of March 31, 2021. However, with the Temporary Article 13 added to the Corporate Tax Law No: 5520 and with the Article 11 of the Law on the Procedure of Collection of Public Claims and the Law on the Amendment of Some Laws, which entered into force after being published in the Official Gazette dated April 22, 2021 and numbered 31462, the Corporate Tax rate will be applied as 25% for the corporate earnings for the 2021 taxation period and 23% for the corporate earnings for the 2022 taxation period. This change will be valid for the taxation of corporate earnings for the periods starting from January 1, 2021, starting with the declarations that must be submitted as of July 1, 2021. Since the tax rate change will come into effect as of April 22, 2021, 20% has been used as the tax rate in the period tax and deferred tax calculations in the financial statements dated March 31, 2021.

## **SECTION SEVEN**

### **INTERIM ACTIVITY REPORT**

#### **I. Chairman's Assessment**

The global economy, which contracted sharply in the first half of 2020 due to the coronavirus epidemic, started to recover as of the second half of the year, with gradual normalization, progress in vaccination studies and expanding scope of economic support packages. Despite this, a 3.3% contraction was experienced in the global economy in 2020 due to the contraction in developed countries.

Macro indicators for the first quarter of 2021 indicate that the recovery continues under the leadership of the USA and China. Many institutions, especially the central banks of developed countries, emphasize the necessity of continuing the implementation of support packages in order for the recovery to be permanent. The Turkish economy, which contracted in the second quarter of 2020 due to the impact of the pandemic, entered into a rapid recovery process after comprehensive measures and gradual normalization, and became one of the few countries that completed 2020 with positive growth. Many indicators such as industrial production, foreign trade data and confidence indices show that the strong course of economic activity continues in the first quarter of 2021. Domestic economic activity is expected to perform well in the remainder of the year, with the effect of the progress in the vaccination process and the recovery in the global economy.

In the first quarter of 2021, the assets of our Bank increased by 47,05% compared to the same period of the previous year, while our operating income increased by 91,70%. The amount of our loans, which constitutes 75,19% of our total assets, increased by 41,26% in March 2021 compared to the same period of the previous year and reached TL 23 billion, while our first quarter profit was TL 197,9 million.

Our bank keeping its sustainable growth also in 2021 will continue to fulfill development and investment banking functions in line with development priorities of Turkey in a competitive and dynamic way.

**Dr. Raci KAYA**  
**Chairman of the Board**

## **SECTION SEVEN (Continued)**

### **INTERIM ACTIVITY REPORT (Continued)**

#### **II. CEO and Board Member' Assessment**

Macro leading indicators announced in the first quarter of 2021 point to a positive growth outlook in the global economy. While the recovery in developed countries is led by the USA, China stands out in developing countries. In this development, the rapid progress of the Covid-19 vaccination process, as well as the economic support packages, played an important role. When the data in the reports published by international organizations are evaluated, the global economy is expected to grow by 6% and 4% in 2021 and 2022, respectively.

While the Turkish Banking Sector displayed a positive performance in terms of asset growth in the first two months of 2021, there was a decline in terms of profitability. While the total assets of the sector increased by 29,6% compared to the same month of the previous year and reached TL 6,1 trillion in February 2021, the loans, which constitute the largest share in the asset items, increased by 29,8% and reached the level of TL 3,6 trillion. The net profit of the sector decreased to TL 13,5 billion with an annual decrease of 41,4% in the first two months of the year, and the capital adequacy standard ratio increased by 0,5 points compared to the same month of the previous year and realized at the level of 18,2%.

Despite the loss of momentum in the sector domestically, our Bank's strong performance trend continued in the first quarter of 2021. As of March 2021, our assets increased by 9,3% compared to the end of 2020; by 47,1% compared to the same period of the previous year and reached TL 30,7 billion.

While the amount of our loans, which constitute 75,2% of our total assets, reached TL 23 billion in March 2021, our loan volume increased by 13% compared to the end of 2020 and by 41,3% compared to the same period of the previous year. The ratio of gross non-performing loans to total loans, which is an important indicator of asset quality, to total loans increased by 0,3 points compared to the same period of the previous year and realized at the level of 0,9% in the first quarter of 2021. The capital adequacy ratio was 21,04%, above the sector average. Our profit for the first three months of 2021 was TL 197,9 million.

Adding a new support to renewable energy projects in line with Turkey's development goals, our Bank signed a "Green" themed loan agreement with the Japanese Bank for International Cooperation (JBIC) for USD 170 million.

Our Bank provides financial consultancy, capital markets consultancy, merger and acquisition consultancy services to both private sector and public institutions in the field of investment banking. Continuing its activities with a responsible banking approach, in this context, our Bank mediated the first low-carbon economy bond issue of Turkey, amounting to TL 200 million.

In line with the development goals of our country, our Bank contributes to sustainable growth with credit support to investments and will continue to support the national economy with development and investment banking activities in the upcoming period.

#### **VI. Activities of the Bank's I. Term in 2021**

##### **Financing Activities and Relations with Financial Institutions**

The loan agreement for providing COVID-19 financing facility for USD 300 million from the Asian Infrastructure Investment Bank was signed on August 17, 2020. It will be made available to SMEs and large enterprises in order to reduce the effects of the credit pandemic. The first tranche of the loan in the amount of 100 million USD was transferred to the Bank accounts on 28 December 2020. Credit disbursement and reporting studies are ongoing.

The loan agreement for providing an Emergency Company Support Loan of 250 million USD from the World Bank was signed on September 9, 2020. The loan will be used for the financing of SMEs affected by the pandemic. The first tranche of the loan, amounting to 10 million USD, was transferred to the Bank accounts on 30 March 2021.

The loan agreement with the Development Bank of China for providing 200 million USD of financing is expected to be completed in the second quarter of 2021.

Negotiations on obtaining USD 170 million GREEN III titled energy and efficiency loan from Japan International Development Bank JBIC have been signed on 29 March 2021.

Follow-up studies are continuing to obtain 150 million USD renewable energy and efficiency loan from the OPEC Fund for International Development OFID.

##### **Financing Activities and Relations with Financial Institutions (Continued)**

Within the scope of providing 100 million EUR COVID-19 loan from the German Development Bank; informed that the loan offer could be submitted in the second quarter of 2021.

International Rating Agency Fitch Ratings announced the Bank's credit rating as BB- Stable as of 26 February 2021.

##### **Project Activities, Consultancy and Technical Assistance Services**

The RPM (Risk Sharing Mechanism) project, which was developed for the utilization of the geothermal resources of our country, financed by grants from the CTF fund through the World Bank, is carried out by the Bank. Within the framework of the project, it is aimed to partially meet the costs of the wells to be opened by geothermal investors for resource exploration purposes in case of failure. Based on the experience gained from the first round of implementation and the feedback received from the companies participating in the program, some changes were made within the scope of the RPM project and the Text of Amendment (Third Amendment to the CTF) based on the original contract signed between the World Bank and the Bank (CTF Grant No.TF0A1532, 30.11.2016 Grant Agreement) was signed on February 16, 2021. In the first round of implementation of the RPM, 7 projects were covered, and Beneficiary Agreements were signed for 3 projects. Within the scope of the first signed contract, road construction and preparation works are continuing for the drilling activity of 3S Kale Niğde Enerji Üretim A.Ş. in the Kitreli-Çömlekçi license area. Environmental, social and land acquisition administrative permit processes for another signed project, and contract preparations for other projects are ongoing. At the same time, before the second round of the RPM project, a Consultation Workshop was organized with the participation of all stakeholders in the geothermal sector and the World Bank on January 26, 2021, and a presentation was made to the participants, introducing the changes in the second round implementation of the program. After the workshop, the Declaration of Intent (EOI) application process for the RPM second round application started and continued until March 12, 2021. For the second round of RPM application, a Declaration of Intent has been received for a total of 18 geothermal resource development projects, and the technical, financial and environmental social assessment of the projects continues. After the evaluation, the projects to be shortlisted will be determined and then the actual application process will begin.

In addition, since the Bank is the implementer of the RPM project in Turkey, it is a participant in the GEORISK project, which aims to share the existing insurance systems to meet geothermal risks among other countries, to develop and implement new risk assessment tools in order to effectively evaluate geothermal resources in European countries. Participation was made to the web meetings held every month as part of the project and attended by the organizations involved in the project. Also, on January 21, 2021, GEORISK-3 The National Workshop was organized online. At the workshop, which included the geothermal sector stakeholders besides the officials of TÜBİTAK and JESDER, who are the participants of the Georisk project, the Bank made a presentation introducing the experiences gained from the first round of implementation of the RPM project. Also, GEORISK-4. Within the scope of the work package, within the framework of the policy for the geothermal sector in Turkey, a report containing up-to-date data on relevant laws and regulations and information on sector development was prepared and shared with project members. GEORISK-5, which covers the business activities of the Bank in the project. Studies within the scope of the work package are ongoing.

##### **Crediting Activities**

In the period of January - March 2021 credit applications from 48 companies were accepted as 2.384 million TL, 166 million EUR and 358 million USD, and their total value was 6.985 million TL. 58% (4.080 million- TL) of these applications are for manufacturing industry, 25% (1.748 million-TL) for energy, 6% (379 million-TL) for tourism and 11% (778 million-TL) for other sectors. In the period of January - March 2021, 34 companies were provided with loans of 18 million EUR, 97 million USD and 267 million TL, with a total value of 1.187 million TL. 46% of the loans granted belong to the energy sector, 33% to the manufacturing industry, 6% to the tourism sector and 15% to the financial sector.
